

hnRNP A1 Antibody

Rabbit mAb Catalog # AP91297

Product Information

Application WB, IHC, IF, FC, ICC, IHF

Primary Accession <u>P09651</u>

Reactivity Rat, Human, Mouse

Clonality Monoclonal

Other Names HNRNPA 1; HNRNPA1; HNRPA1;

IsotypeRabbit IgGHostRabbitCalculated MW38747

Additional Information

Dilution WB 1:500~1:2000 IHC 1:50~1:200 ICC/IF 1:50~1:200 FC 1:50

Purification Affinity-chromatography

Immunogen A synthesized peptide derived from human hnRNP A1

Description hnRNP A1 regulates the alternative splicing of c-Src and c-H-Ras and modifies

initiation of translation of the fibroblast growth factor 2 mRNA. hnRNP A1 expression level is elevated in many cancers; knockdown of hnRNP A1 leads to apoptosis in various cancer cells. Although predominantly nuclear, hnRNP A1 is continually transported from the nucleus to the cytoplasm where it disassociates from mRNA and is rapidly re-imported into the nucleus.

Storage Condition and Buffer

Rabbit IgG in phosphate buffered saline, pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol. Store at +4°C short term. Store at -20°C long term.

Avoid freeze / thaw cycle.

Protein Information

Name HNRNPA1

Synonyms HNRPA1

Function Involved in the packaging of pre-mRNA into hnRNP particles, transport of

poly(A) mRNA from the nucleus to the cytoplasm and modulation of splice site selection (PubMed:17371836). Plays a role in the splicing of pyruvate kinase PKM by binding repressively to sequences flanking PKM exon 9, inhibiting exon 9 inclusion and resulting in exon 10 inclusion and production of the PKM M2 isoform (PubMed:20010808). Binds to the IRES and thereby inhibits the translation of the apoptosis protease activating factor APAF1

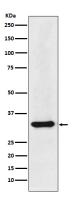

(PubMed:31498791). May bind to specific miRNA hairpins

(PubMed: 28431233).

Cellular Location Nucleus. Cytoplasm Note=Localized in cytoplasmic mRNP granules containing

untranslated mRNAs. Shuttles continuously between the nucleus and the cytoplasm along with mRNA. Component of ribonucleosomes (PubMed:17289661) Nucleus. Note=(Microbial infection) SARS coronavirus-2/SARS-CoV-2 ORF6 protein increases accumulation to the nucleus.

Images

Western blot analysis of hnRNP A1 expression in HepG2 cell lysate.
