

# **BubR1 Antibody**

Rabbit mAb Catalog # AP91311

### **Product Information**

**Application** WB, IHC, FC, IP

Primary Accession 060566

Reactivity Rat, Human, Mouse

**Clonality** Monoclonal

Other Names hBUBR1; Mitotic checkpoint kinase MAD3L Protein SSK1; BUBR1; BUBR1;

MAD3L; SSK1;

IsotypeRabbit IgGHostRabbitCalculated MW119545

#### **Additional Information**

**Dilution** WB 1:1000~1:5000 IHC 1:50~1:200 IP 1:30 FC 1:50

**Purification** Affinity-chromatography

**Immunogen** A synthesized peptide derived from human BubR1

**Description** Essential component of the mitotic checkpoint. Required for normal mitosis

progression. The mitotic checkpoint delays anaphase until all chromosomes are properly attached to the mitotic spindle. One of its checkpoint functions is to inhibit the activity of the anaphase-promoting complex/cyclosome (APC/C) by blocking the binding of CDC20 to APC/C, independently of its kinase activity. The other is to monitor kinetochore activities that depend on the kinetochore motor CENPE. Required for kinetochore localization of CENPE. Rabbit IgG in phosphate buffered saline , pH 7.4, 150mM NaCl, 0.02% sodium

Storage Condition and Buffer Rabbit IgG in ph

azide and 50% glycerol. Store at +4°C short term. Store at -20°C long term.

Avoid freeze / thaw cycle.

#### **Protein Information**

Name BUB1B

Synonyms BUBR1, MAD3L, SSK1

**Function** Essential component of the mitotic checkpoint. Required for normal mitosis

progression. The mitotic checkpoint delays anaphase until all chromosomes are properly attached to the mitotic spindle. One of its checkpoint functions is to inhibit the activity of the anaphase- promoting complex/cyclosome (APC/C) by blocking the binding of CDC20 to APC/C, independently of its kinase activity. The other is to monitor kinetochore activities that depend on the kinetochore motor CENPE. Required for kinetochore localization of CENPE. Negatively regulates PLK1 activity in interphase cells and suppresses

centrosome amplification. Also implicated in triggering apoptosis in polyploid

cells that exit aberrantly from mitotic arrest. May play a role for tumor suppression.

зиррі

Cytoplasm. Nucleus. Chromosome, centromere, kinetochore. Cytoplasm, cytoskeleton, microtubule organizing center, centrosome. Note=Cytoplasmic in interphase cells. Associates with the kinetochores in early prophase.

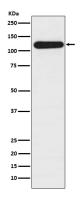

Kinetochore localization requires BUB1, PLK1 and KNL1

**Tissue Location** Highly expressed in thymus followed by spleen. Preferentially expressed in

tissues with a high mitotic index

## **Images**

**Cellular Location** 

Western blot analysis of BubR1 expression in HepG2 cell lysate.
