

# FEN1 Antibody

Rabbit mAb Catalog # AP91386

## **Product Information**

Application Primary Accession Reactivity Clonality Other Names	WB, IHC <u>P39748</u> Rat, Human, Mouse Monoclonal DNase IV; FEN1; Flap endonuclease 1; Flap structure specific endonuclease 1; hFEN-1; hFEN1; Maturation factor 1; MF1; Rad2;
lsotype	Rabbit IgG
Host	Rabbit
Calculated MW	42593

## **Additional Information**

Dilution Purification Immunogen Description	WB 1:500~1:2000 IHC 1:100~1:500 Affinity-chromatography A synthesized peptide derived from human FEN1 Acts as a genome stabilization factor that prevents flaps from equilibrating into structurs that lead to duplications and deletions. Also possesses 5'-3' exonuclease activity on nicked or gapped double-stranded DNA, and exhibits RNase H activity. Also involved in replication and repair of rDNA and in
Storage Condition and Buffer	repairing mitochondrial DNA.

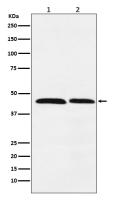

### **Protein Information**

Name	FEN1 {ECO:0000255 HAMAP-Rule:MF_03140}
Synonyms	RAD2
Function	Structure-specific nuclease with 5'-flap endonuclease and 5'- 3' exonuclease activities involved in DNA replication and repair. During DNA replication, cleaves the 5'-overhanging flap structure that is generated by displacement synthesis when DNA polymerase encounters the 5'-end of a downstream Okazaki fragment. It enters the flap from the 5'-end and then tracks to cleave the flap base, leaving a nick for ligation. Also involved in the long patch base excision repair (LP-BER) pathway, by cleaving within the apurinic/apyrimidinic (AP) site- terminated flap. Acts as a genome stabilization factor that prevents flaps from equilibrating into structures that lead to duplications and deletions. Also possesses 5'-3' exonuclease activity on nicked or gapped double-stranded DNA, and exhibits RNase H activity. Also involved in

#### **Cellular Location**

[Isoform 1]: Nucleus, nucleolus. Nucleus, nucleoplasm. Note=Resides mostly in the nucleoli and relocalizes to the nucleoplasm upon DNA damage

## Images

Western blot analysis of FEN1 expression in (1) HeLa cell lysate; (2) Daudi cell lysate.
