

Ctip1 Antibody

Rabbit mAb

Catalog # AP91581

Product Information

Application	WB, IHC, IF, FC, ICC, IHF
Primary Accession	Q9H165
Reactivity	Rat, Human, Mouse
Clonality	Monoclonal
Other Names	EVI9; CTIP1; ZNF856; HBFQTL5; BCL11A-L; BCL11A-S; BCL11a-M; BCL11A-XL;
Isotype	Rabbit IgG
Host	Rabbit
Calculated MW	91197

Additional Information

Dilution	WB 1:1000~1:5000 IHC 1:50~1:200 ICC/IF 1:50~1:200 FC 1:100
Purification	Affinity-chromatography
Immunogen	A synthesized peptide derived from human Ctip1
Description	Functions as a myeloid and B-cell proto-oncogene. May play important roles in leukemogenesis and hematopoiesis. An essential factor in lymphopoiesis, is required for B-cell formation in fetal liver. May function as a modulator of the transcriptional repression activity of ARP1.
Storage Condition and Buffer	Rabbit IgG in phosphate buffered saline , pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol. Store at +4°C short term. Store at -20°C long term. Avoid freeze / thaw cycle.

Protein Information

Name	BCL11A
Synonyms	CTIP1, EVI9, KIAA1809, ZNF856
Function	Transcription factor (PubMed: 16704730 , PubMed: 29606353). Associated with the BAF SWI/SNF chromatin remodeling complex (PubMed: 23644491 , PubMed: 39607926). Binds to the 5'-TGACCA-3' sequence motif in regulatory regions of target genes, including a distal promoter of the HBG1 hemoglobin subunit gamma-1 gene (PubMed: 29606353 , PubMed: 39423807). Involved in regulation of the developmental switch from gamma- to beta-globin, probably via direct repression of HBG1; hence indirectly repressing fetal hemoglobin (HbF) level (PubMed: 26375765 , PubMed: 29606353 , PubMed: 39423807 , PubMed: 39607926). Involved in brain development (PubMed: 27453576). May play a role in hematopoiesis (By similarity). Essential factor in lymphopoiesis required for B-cell formation in fetal liver (By similarity). May function as a modulator of the transcriptional repression activity of NR2F2 (By similarity).

Cellular Location

Cytoplasm. Nucleus. Chromosome. Note=Associates with the nuclear body
Colocalizes with SUMO1 and SENP2 in nuclear speckles (By similarity)
[Isoform 2]: Cytoplasm. Nucleus Note=Predominantly localized in the nucleus
in nuclear paraspeckles

Tissue Location

Expressed at high levels in brain, spleen thymus, bone marrow and testis.
Expressed in CD34-positive myeloid precursor cells, B-cells, monocytes and
megakaryocytes. Expression is tightly regulated during B-cell development.

Images

Western blot analysis of Ctif1 expression in Jurkat cell lysate.
