

# PSB9 / LMP2 Antibody

Rabbit mAb Catalog # AP91760

#### **Product Information**

**Application** WB, IF, FC, ICC

Primary Accession P28065

Reactivity Rat, Human, Mouse

**Clonality** Monoclonal

Other Names Beta1i; LMP2; PSMB 9; PSMB6i; PSMB9; RING12;

IsotypeRabbit IgGHostRabbitCalculated MW23264

#### **Additional Information**

**Dilution** WB 1:1000~1:5000 ICC/IF 1:50~1:200 FC 1:50

**Purification** Affinity-chromatography

**Immunogen** A synthesized peptide derived from human Proteasome 20S LMP2

**Description** The proteasome is a multicatalytic proteinase complex which is characterized

by its ability to cleave peptides with Arg, Phe, Tyr, Leu, and Glu adjacent to the

leaving group at neutral or slightly basic pH. The proteasome has an

ATP-dependent proteolytic activity.

Storage Condition and Buffer Rabbit IgG in phosphate buffered saline, pH 7.4, 150mM NaCl, 0.02% sodium

azide and 50% glycerol. Store at +4°C short term. Store at -20°C long term.

Avoid freeze / thaw cycle.

### **Protein Information**

Name PSMB9

**Synonyms** LMP2, PSMB6i, RING12

**Function** The proteasome is a multicatalytic proteinase complex which is

characterized by its ability to cleave peptides with Arg, Phe, Tyr, Leu, and Glu

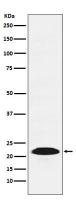

adjacent to the leaving group at neutral or slightly basic pH

(PubMed:<u>33727065</u>, PubMed:<u>34819510</u>). The proteasome has an ATP-dependent proteolytic activity. This subunit is involved in antigen processing to generate class I binding peptides. Replacement of PSMB6 by PSMB9 increases the capacity of the immunoproteasome to cleave model peptides

after hydrophobic and basic residues.

Cytoplasm {ECO:0000255 | PROSITE-ProRule:PRU00809}. Nucleus
