

Bcl10 Antibody

Rabbit mAb Catalog # AP92017

Product Information

Application	WB, IHC, IF, ICC, IP, IHF
Primary Accession	<u>095999</u>
Reactivity	Human
Clonality	Monoclonal
Other Names	BCL10; CARMEN; CIPER; CLAP; c-E10; mE10;
lsotype	Rabbit IgG
Host	Rabbit
Calculated MW	26252

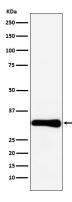

Additional Information

Dilution Purification Immunogen	WB 1:500~1:2000 IHC 1:50~1:200 ICC/IF 1:50~1:200 IP 1:50 Affinity-chromatography A synthesized peptide derived from human Bcl10
Description	Promotes apoptosis, pro-caspase-9 maturation and activation of NF-kappa-B via NIK and IKK. May be an adapter protein between upstream TNFR1-TRADD-RIP complex and the downstream NIK-IKK-IKAP complex. Is a substrate for MALT1.
Storage Condition and Buffer	

Protein Information

Name	BCL10 {ECO:0000303 PubMed:9989495, ECO:0000312 HGNC:HGNC:989}
Function	Plays a key role in both adaptive and innate immune signaling by bridging CARD domain-containing proteins to immune activation (PubMed:10187770, PubMed:10364242, PubMed:10400625, PubMed:24074955, PubMed:25365219). Acts by channeling adaptive and innate immune signaling downstream of CARD domain-containing proteins CARD9, CARD11 and CARD14 to activate NF-kappa-B and MAP kinase p38 (MAPK11, MAPK12, MAPK13 and/or MAPK14) pathways which stimulate expression of genes encoding pro-inflammatory cytokines and chemokines (PubMed:24074955). Recruited by activated CARD domain-containing proteins: homooligomerized CARD domain-containing proteins form a nucleating helical template that recruits BCL10 via CARD-CARD interaction, thereby promoting polymerization of BCL10, subsequent recruitment of MALT1 and formation of a CBM complex (PubMed:24074955). This leads to activation of NF-kappa-B and MAP kinase p38 (MAPK11, MAPK12, MAPK13 and/or MAPK14) pathways which stimulate expression of genes encoding pro-inflammatory cytokines and chemokines

	(PubMed: <u>18287044</u> , PubMed: <u>24074955</u> , PubMed: <u>27777308</u>). Activated by CARD9 downstream of C-type lectin receptors; CARD9-mediated signals are essential for antifungal immunity (PubMed: <u>26488816</u>). Activated by CARD11 downstream of T-cell receptor (TCR) and B-cell receptor (BCR) (PubMed: <u>18264101</u> , PubMed: <u>18287044</u> , PubMed: <u>24074955</u> , PubMed: <u>27777308</u>). Promotes apoptosis, pro-caspase-9 maturation and activation of NF-kappa-B via NIK and IKK (PubMed: <u>10187815</u>).
Cellular Location	Cytoplasm, perinuclear region. Membrane raft. Note=Appears to have a perinuclear, compact and filamentous pattern of expression. Also found in the nucleus of several types of tumor cells. Colocalized with DPP4 in membrane rafts.
Tissue Location	Ubiquitous
Images	

Western blot analysis of Bcl10 expression in HeLa cell lysate.
