

# **Granulin Antibody**

Rabbit mAb Catalog # AP92340

### **Product Information**

**Application** WB, IHC, IF, FC, ICC, IP, IHF

Primary Accession P28799
Reactivity Human
Clonality Monoclonal

Other Names Acrogranin; CLN11; GEP; GP88; Granulins; GRN; PCDGF; PEPI; PGRN;

Proepithelin; Progranulin;

IsotypeRabbit IgGHostRabbitCalculated MW63544

#### **Additional Information**

**Dilution** WB 1:500~1:2000 IHC 1:50~1:200 ICC/IF 1:50~1:200 IP 1:50 FC 1:100

**Purification** Affinity-chromatography

**Immunogen** A synthesized peptide derived from human Granulin

**Description** Granulins have possible cytokine-like activity. They may play a role in

inflammation, wound repair, and tissue remodeling.

**Storage Condition and Buffer** Rabbit IgG in phosphate buffered saline , pH 7.4, 150mM NaCl, 0.02% sodium

azide and 50% glycerol. Store at +4°C short term. Store at -20°C long term.

Avoid freeze / thaw cycle.

#### **Protein Information**

Name GRN ( HGNC:4601)

**Function** Secreted protein that acts as a key regulator of lysosomal function and as a

growth factor involved in inflammation, wound healing and cell proliferation

(PubMed: 12526812, PubMed: 18378771, PubMed: 28073925,

PubMed:28453791, PubMed:28541286). Regulates protein trafficking to lysosomes, and also the activity of lysosomal enzymes (PubMed:28453791, PubMed:28541286). Also facilitates the acidification of lysosomes, causing degradation of mature CTSD by CTSB (PubMed:28073925). In addition, functions as a wound-related growth factor that acts directly on dermal fibroblasts and endothelial cells to promote division, migration and the formation of capillary-like tubule structures (By similarity). Also promotes epithelial cell proliferation by blocking TNF-mediated neutrophil activation preventing release of oxidants and proteases (PubMed:12526812). Moreover, modulates inflammation in neurons by preserving neurons survival, axonal

outgrowth and neuronal integrity (PubMed: 18378771).

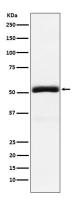

**Cellular Location** Secreted. Lysosome Note=Endocytosed by SORT1 and delivred to lysosomes

(PubMed:21092856, PubMed:28073925). Targeted to lysosome by PSAP via M6PR and LRP1, in both biosynthetic and endocytic pathways (PubMed:26370502, PubMed:28073925). Co-localized with GBA1 in the intracellular trafficking compartments until to lysosome (By similarity) {ECO:0000250 | UniProtKB:P28798, ECO:0000269 | PubMed:21092856, ECO:0000269 | PubMed:26370502, ECO:0000269 | PubMed:28073925}

#### **Tissue Location**

In myelogenous leukemic cell lines of promonocytic, promyelocytic, and proerythroid lineage, in fibroblasts, and very strongly in epithelial cell lines. Present in inflammatory cells and bone marrow. Highest levels in kidney
