

CD24 Antibody

Rabbit mAb Catalog # AP92715

Product Information

ApplicationWB, IPPrimary AccessionP25063ReactivityHumanClonalityMonoclonal

Other Names CD24; CD24 antigen; CD24A; HAS; Signal transducer CD24;

IsotypeRabbit IgGHostRabbitCalculated MW8083

Additional Information

Dilution WB 1:500~1:2000 IP 1:50 **Purification** Affinity-chromatography

Immunogen A synthesized peptide derived from human CD24

Description Modulates B-cell activation responses. Signaling could be triggered by the

binding of a lectin-like ligand to the CD24 carbohydrates, and transduced by the release of second messengers derived from the GPI-anchor. Promotes

AG-dependent proliferation of B-cells, and prevents their terminal

differentiation into antibody-forming cells.

Storage Condition and Buffer Rabbit IgG in phosphate buffered saline, pH 7.4, 150mM NaCl, 0.02% sodium

azide and 50% glycerol. Store at +4°C short term. Store at -20°C long term.

Avoid freeze / thaw cycle.

Protein Information

Name CD24

Synonyms CD24A

Function May have a pivotal role in cell differentiation of different cell types. Signaling

could be triggered by the binding of a lectin-like ligand to the CD24

carbohydrates, and transduced by the release of second messengers derived from the GPI-anchor. Modulates B-cell activation responses. Promotes AG-dependent proliferation of B-cells, and prevents their terminal

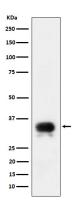

differentiation into antibody-forming cells (PubMed: 11313396). In association with SIGLEC10 may be involved in the selective suppression of the immune response to danger-associated molecular patterns (DAMPs) such as HMGB1, HSP70 and HSP90. Plays a role in the control of autoimmunity (By similarity).

Cellular Location Cell membrane; Lipid-anchor, GPI-anchor.

Tissue Location

B-cells. Expressed in a number of B-cell lines including P32/ISH and Namalwa. Expressed in erythroleukemia cell and small cell lung carcinoma cell lines. Also expressed on the surface of T-cells.

Images

Western blot analysis of CD24 expression in SH-SY5Y cell lysate.
