

Phospho-Nucleolin (T76) Antibody

Rabbit mAb Catalog # AP92936

Product Information

ApplicationWB, IHCPrimary AccessionP19338ReactivityHumanClonalityMonoclonal

Other Names MS1116; NCL; Nucl; Nucleolin; Protein C23;

IsotypeRabbit IgGHostRabbitCalculated MW76614

Additional Information

Dilution WB 1:500~1:2000 IHC 1:50~1:200

Purification Affinity-chromatography

ImmunogenA synthesized peptide derived from human Phospho-Nucleolin (T76)DescriptionNucleolin is the major nucleolar protein of growing eukaryotic cells. It isfound associated with intrapulated at chromatin and pro-ribosomal particle

found associated with intranucleolar chromatin and pre-ribosomal particles.

It induces chromatin decondensation by binding to histone H1.

Storage Condition and Buffer Rabbit IgG in phosphate buffered saline , pH 7.4, 150mM NaCl, 0.02% sodium

azide and 50% glycerol. Store at +4°C short term. Store at -20°C long term.

Avoid freeze / thaw cycle.

Protein Information

Name NCL

Function Nucleolin is the major nucleolar protein of growing eukaryotic cells. It is

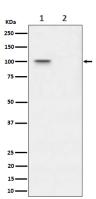

found associated with intranucleolar chromatin and pre-ribosomal particles. It induces chromatin decondensation by binding to histone H1. It is thought to play a role in pre-rRNA transcription and ribosome assembly. May play a role in the process of transcriptional elongation. Binds RNA oligonucleotides with 5'-UUAGGG- 3' repeats more tightly than the telomeric single-stranded

DNA 5'- TTAGGG-3' repeats.

Cellular Location Nucleus, nucleolus. Cytoplasm. Note=Localized in cytoplasmic mRNP granules

containing untranslated mRNAs

Images

expression in (1) 293T cell lysate; (2) 293T cell treated with Lambda Phosphatase lysate.
