

## Adiponectin Antibody

Rabbit mAb Catalog # AP93073

## **Product Information**

Application Primary Accession Reactivity Clonality Other Names	WB, IHC <u>Q15848</u> Human Monoclonal ACDC; ACRP30; Adipocyte; Adiponectin; Adiponectin precursor; Adipoq; ADIPQTL1; ADPN; APM1; GBP28; Gelatin binding protein 28;
lsotype	Rabbit IgG
Host	Rabbit
Calculated MW	26414

## **Additional Information**

Dilution Purification Immunogen	WB 1:500~1:2000 IHC 1:50~1:200 Affinity-chromatography A synthesized peptide derived from human Adiponectin
Description	Important adipokine involved in the control of fat metabolism and insulin sensitivity, with direct anti-diabetic, anti-atherogenic and anti-inflammatory activities. Stimulates AMPK phosphorylation and activation in the liver and the skeletal muscle, enhancing glucose utilization and fatty-acid combustion.
Storage Condition and Buffer	

## **Protein Information**

Name	ADIPOQ
Function	Important adipokine involved in the control of fat metabolism and insulin sensitivity, with direct anti-diabetic, anti-atherogenic and anti-inflammatory activities. Stimulates AMPK phosphorylation and activation in the liver and the skeletal muscle, enhancing glucose utilization and fatty-acid combustion. Antagonizes TNF-alpha by negatively regulating its expression in various tissues such as liver and macrophages, and also by counteracting its effects. Inhibits endothelial NF-kappa-B signaling through a cAMP-dependent pathway. May play a role in cell growth, angiogenesis and tissue remodeling by binding and sequestering various growth factors with distinct binding affinities, depending on the type of complex, LMW, MMW or HMW.
Cellular Location	Secreted.
Tissue Location	Synthesized exclusively by adipocytes and secreted into plasma.
