

Integrin beta 7 Antibody

Rabbit mAb Catalog # AP93255

Product Information

Application WB
Primary Accession P26010
Reactivity Human
Clonality Monoclonal

Other Names Gut homing receptor beta subunit; Integrin beta 7 subunit; Integrin beta-P;

Integrin, beta 7; ITB7; Itgb7; Ly69; M290 IEL antigen;

IsotypeRabbit IgGHostRabbitCalculated MW86903

Additional Information

Dilution WB 1:500~1:2000 **Purification** Affinity-chromatography

Immunogen A synthesized peptide derived from human Integrin beta 7

Description Integrin alpha-4/beta-7 (Peyer patches-specific homing receptor LPAM-1) is an

adhesion molecule that mediates lymphocyte migration and homing to

gut-associated lymphoid tissue (GALT).

Storage Condition and Buffer Rabbit IgG in phosphate buffered saline, pH 7.4, 150mM NaCl, 0.02% sodium

azide and 50% glycerol. Store at +4°C short term. Store at -20°C long term.

Avoid freeze / thaw cycle.

Protein Information

Name ITGB7

Function Integrin ITGA4/ITGB7 (alpha-4/beta-7) (Peyer patches-specific homing

receptor LPAM-1) is an adhesion molecule that mediates lymphocyte migration and homing to gut-associated lymphoid tissue (GALT) (Probable). Integrin ITGA4/ITGB7 interacts with the cell surface adhesion molecules MADCAM1 which is normally expressed by the vascular endothelium of the gastrointestinal tract (PubMed:10837471, PubMed:14608374). Also interacts with VCAM1 and fibronectin, an extracellular matrix component (Probable). It recognizes one or more domains within the alternatively spliced CS-1 region of fibronectin (Probable). Interactions involve the tripeptide L-D-T in MADCAM1, and L-D-V in fibronectin (Probable). Integrin ITGAE/ITGB7

(alpha-E/beta-7, HML-1) is a receptor for E-cadherin (PubMed:<u>10837471</u>).

Cellular Location Cell membrane; Single-pass type I membrane protein

Tissue Location Expressed in a variety of leukocyte lines.

Please note: All products are 'FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC OR THERAPEUTIC PROCEDURES'.
