

LC3 A/B Rabbit Polyclonal Antibody

LC3 A/B Rabbit Polyclonal Antibody

Catalog # AP93585

Product Information

Application	WB, E, IHC-P
Primary Accession	Q9H492/Q9GZQ8
Reactivity	Human, Mouse, Rat
Clonality	Polyclonal

Additional Information

Dilution	WB~~1:1000 E~~N/A IHC-P~~N/A
Storage Conditions	-20°C

Protein Information

Background

function:Probably involved in formation of autophagosomal vacuoles (autophagosomes).,PTM:The precursor molecule is cleaved by APG4B/ATG4B to form the cytosolic form, LC3-I. This is activated by APG7L/ATG7, transferred to ATG3 and conjugated to phospholipid to form the membrane-bound form, LC3-II.,similarity:Belongs to the MAP1 LC3 family.,subcellular location:LC3-II binds to the autophagic membranes.,subunit:3 different light chains, LC1, LC2 and LC3, can associate with MAP1A and MAP1B proteins.,tissue specificity:Most abundant in heart, brain, liver, skeletal muscle and testis but absent in thymus and peripheral blood leukocytes.,

Images

Immunohistochemical analysis of paraffin-embedded human liver cancer. 1, Antibody was diluted at 1:200(4° overnight). 2, Tris-EDTA,pH9.0 was used for antigen retrieval. 3,Secondary antibody was diluted at 1:200(room temperature, 45min).
