

PIGU (11T18) Rabbit Monoclonal Antibody

PIGU (11T18) Rabbit Monoclonal Antibody

Catalog # AP93753

Product Information

Application	WB, IHC-P, IF
Primary Accession	Q9H490 , Q8K358 , Q8CHJ1
Reactivity	Human, Mouse, Rat
Clonality	Monoclonal
Calculated MW	50052

Additional Information

Gene ID	128869
Dilution	WB~~1:1000 IHC-P~~N/A IF~~1:50~200
Storage Conditions	-20°C

Protein Information

Name	PIGU (HGNC:15791)
Synonyms	CDC91L1
Function	Component of the glycosylphosphatidylinositol-anchor (GPI- anchor) transamidase (GPI-T) complex that catalyzes the formation of the linkage between a proprotein and a GPI-anchor and participates in GPI anchored protein biosynthesis (PubMed: 12802054 , PubMed: 31353022 , PubMed: 34576938 , PubMed: 35165458 , PubMed: 35551457 , PubMed: 37684232). Binds the lipid portion of GPI-anchor (PubMed: 37684232). May act as an organizer in the transmembrane layer to recruit other subunits, and thus is essential for assembly of the complex (PubMed: 35165458 , PubMed: 35551457).
Cellular Location	Endoplasmic reticulum membrane; Multi-pass membrane protein

Background

The protein encoded by this gene shares similarity with *Saccharomyces cerevisiae* Cdc91, a predicted integral membrane protein that may function in cell division control. The protein encoded by this gene is the fifth subunit of GPI transamidase that attaches GPI-anchors to proteins. [provided by RefSeq, Jul 2008]
