

HNF4A Antibody (N-term)

Purified Rabbit Polyclonal Antibody (Pab) Catalog # AP9435a

Product Information

Application WB, IF, E Primary Accession P41235

Other Accession <u>Q9WUU6, Q14541, Q91766, P22449, P49698</u>

Reactivity Human

Predicted Mouse, Rat, Xenopus

Host Rabbit
Clonality Polyclonal
Isotype Rabbit IgG
Clone Names RB17744
Calculated MW 52785
Antigen Region 107-139

Additional Information

Gene ID 3172

Other Names Hepatocyte nuclear factor 4-alpha, HNF-4-alpha, Nuclear receptor subfamily 2

group A member 1, Transcription factor 14, TCF-14, Transcription factor

HNF-4, HNF4A, HNF4, NR2A1, TCF14

Target/Specificity This HNF4A antibody is generated from rabbits immunized with a KLH

conjugated synthetic peptide between 107-139 amino acids from the

N-terminal region of human HNF4A.

Dilution WB~~1:1000 IF~~1:10~50 E~~Use at an assay dependent concentration.

Format Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide.

This antibody is prepared by Saturated Ammonium Sulfate (SAS) precipitation

followed by dialysis against PBS.

Storage Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store

at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions HNF4A Antibody (N-term) is for research use only and not for use in

diagnostic or therapeutic procedures.

Protein Information

Name HNF4A

Synonyms HNF4, NR2A1, TCF14

Function

Transcriptional regulator which controls the expression of hepatic genes during the transition of endodermal cells to hepatic progenitor cells, facilitating the recruitment of RNA pol II to the promoters of target genes (PubMed:30597922). Activates the transcription of CYP2C38 (By similarity). Represses the CLOCK-BMAL1 transcriptional activity and is essential for circadian rhythm maintenance and period regulation in the liver and colon cells (PubMed:30530698).

Cellular Location

Nucleus.

Background

HNF4A is a nuclear transcription factor which binds DNA as a homodimer. The encoded protein controls the expression of several genes, including hepatocyte nuclear factor 1 alpha, a transcription factor which regulates the expression of several hepatic genes. This gene may play a role in development of the liver, kidney, and intestines.
