

Anti-CD55 Antibody

Catalog # AP95747

Product Information

Application	WB, FC
Primary Accession	P08174
Reactivity	Human
Host	Mouse
Clonality	Monoclonal
Calculated MW	41400

Additional Information

Gene ID	1604
Other Names	CR; DAF; Complement decay-accelerating factor; CD55
Target/Specificity	Recombinant fusion protein of human CD55 expressed in E. Coli
Dilution	WB~~WB (1/500 - 1/1000) FC~~FC (1/100 - 1/200)
Format	Mouse IgG1. Liquid in PBS, pH 7.3, 30% glycerol, and 0.01% sodium azide.
Storage	Store at -20 °C.Stable for 12 months from date of receipt

Protein Information

Name	CD55
Synonyms	CR, DAF
Function	This protein recognizes C4b and C3b fragments that condense with cell-surface hydroxyl or amino groups when nascent C4b and C3b are locally generated during C4 and c3 activation. Interaction of daf with cell-associated C4b and C3b polypeptides interferes with their ability to catalyze the conversion of C2 and factor B to enzymatically active C2a and Bb and thereby prevents the formation of C4b2a and C3bBb, the amplification convertases of the complement cascade (PubMed: 7525274). Inhibits complement activation by destabilizing and preventing the formation of C3 and C5 convertases, which prevents complement damage (PubMed: 28657829).
Cellular Location	[Isoform 1]: Cell membrane; Single-pass type I membrane protein [Isoform 3]: Secreted [Isoform 5]: Secreted [Isoform 7]: Cell membrane; Lipid-anchor, GPI-anchor
Tissue Location	Expressed on the plasma membranes of all cell types that are in intimate contact with plasma complement proteins. It is also found on the surfaces of

epithelial cells lining extracellular compartments, and variants of the molecule are present in body fluids and in extracellular matrix

Images

Western blot analysis of CD55 expression in Raji (A), K562 (B) whole cell lysates. (Predicted band size: 41 kD; Observed band size: 72 kD)

Flow cytometric analysis of K562 cells using Anti-CD55 Antibody (green) and negative control (red).
