

# SPN Antibody (Center)

Affinity Purified Rabbit Polyclonal Antibody (Pab) Catalog # AP9623c

# **Product Information**

| Application       | WB, E         |
|-------------------|---------------|
| Primary Accession | <u>P16150</u> |
| Reactivity        | Human         |
| Host              | Rabbit        |
| Clonality         | Polyclonal    |
| Isotype           | Rabbit IgG    |
| Clone Names       | RB23613       |
| Calculated MW     | 40322         |
| Antigen Region    | 226-253       |

#### **Additional Information**

| Gene ID            | 6693   |
|--------------------|--|
| Other Names        | Leukosialin, Galactoglycoprotein, GALGP, Leukocyte sialoglycoprotein,<br>Sialophorin, CD43, SPN, CD43  |
| Target/Specificity | This SPN antibody is generated from rabbits immunized with a KLH<br>conjugated synthetic peptide between 226-253 amino acids from the Central<br>region of human SPN.              |
| Dilution           | WB~~1:1000 E~~Use at an assay dependent concentration.   |
| Format             | Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide.<br>This antibody is purified through a protein A column, followed by peptide<br>affinity purification. |
| Storage            | Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.  |
| Precautions        | SPN Antibody (Center) is for research use only and not for use in diagnostic or therapeutic procedures.  |

### **Protein Information**

| Name     | SPN  |
|----------|--|
| Synonyms | CD43   |
| Function | Predominant cell surface sialoprotein of leukocytes which regulates multiple T-cell functions, including T-cell activation, proliferation, |

|                   | differentiation, trafficking and migration. Positively regulates T-cell trafficking<br>to lymph-nodes via its association with ERM proteins (EZR, RDX and MSN) (By<br>similarity). Negatively regulates Th2 cell differentiation and predisposes the<br>differentiation of T-cells towards a Th1 lineage commitment. Promotes the<br>expression of IFN-gamma by T-cells during T-cell receptor (TCR) activation of<br>naive cells and induces the expression of IFN-gamma by CD4(+) T-cells and to<br>a lesser extent by CD8(+) T-cells (PubMed: <u>18036228</u> ). Plays a role in preparing<br>T-cells for cytokine sensing and differentiation into effector cells by inducing<br>the expression of cytokine receptors IFNGR and IL4R, promoting IFNGR and<br>IL4R signaling and by mediating the clustering of IFNGR with TCR<br>(PubMed: <u>24328034</u> ). Acts as a major E-selectin ligand responsible for Th17<br>cell rolling on activated vasculature and recruitment during inflammation.<br>Mediates Th17 cells, but not Th1 cells, adhesion to E- selectin. Acts as a T-cell<br>counter-receptor for SIGLEC1 (By similarity). |
|-------------------|---|
| Cellular Location | Membrane; Single-pass type I membrane protein. Cell projection, microvillus<br>{ECO:0000250 UniProtKB:P13838}. Cell projection, uropodium<br>{ECO:0000250 UniProtKB:P15702}. Note=Localizes to the uropodium and<br>microvilli via its interaction with ERM proteins (EZR, RDX and MSN)<br>{ECO:0000250 UniProtKB:P13838, ECO:0000250 UniProtKB:P15702}   |
| Tissue Location   | Cell surface of thymocytes, T-lymphocytes, neutrophils, plasma cells and myelomas   |

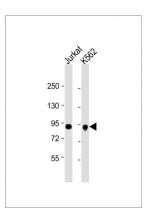

## Background

Sialophorin (leukosialin) is a major sialoglycoprotein on the surface of human T lymphocytes, monocytes, granulocytes, and some B lymphocytes, which appears to be important for immune function and may be part of a physiologic ligand-receptor complex involved in T-cell activation.
