

FAM63A Rabbit pAb

Catalog # AP96319

Product Information

Application	WB
Primary Accession	Q8N5J2
Other Accession	Q8N5J2
Reactivity	Rat, Human, Mouse
Predicted	Pig, Rabbit, Horse, Sheep
Host	Rabbit
Clonality	Polyclonal
Calculated MW	51778
Physical State	Liquid
Immunogen	KLH conjugated synthetic peptide derived from human FAM63A
Epitope Specificity	151-250/469
Isotype	IgG
Purity	affinity purified by Protein A
Buffer	0.01M TBS (pH7.4) with 1% BSA, 0.02% Proclin300 and 50% Glycerol.
SIMILARITY	Belongs to the FAM63 family.
Important Note	This product as supplied is intended for research use only, not for use in human, therapeutic or diagnostic applications.
Background Descriptions	Chromosome 1 is the largest human chromosome spanning about 260 million base pairs and making up 8% of the human genome. There are about 3,000 genes on chromosome 1, and considering the great number of genes there are also a large number of diseases associated with chromosome 1. Notably, the rare aging disease Hutchinson-Gilford progeria is associated with the LMNA gene which encodes lamin A. When defective, the LMNA gene product can build up in the nucleus and cause characteristic nuclear blebs. The mechanism of rapidly enhanced aging is unclear and is a topic of continuing exploration. The MUTYH gene is located on chromosome 1 and is partially responsible for familial adenomatous polyposis. Stickler syndrome, Parkinsons, Gaucher disease and Usher syndrome are also associated with chromosome 1. A breakpoint has been identified in 1q which disrupts the DISC1 gene and is linked to schizophrenia. Aberrations in chromosome 1 are found in a variety of cancers including head and neck cancer, malignant melanoma and multiple myeloma. The FAM63A gene product has been provisionally designated FAM63A pending further characterization.

Additional Information

Gene ID	55793
Other Names	FAM63A; MINDY-1; 1810005H09Rik; 4930504E06Rik; cI-40; mKIAA1390; ni; MINY1_HUMAN; MINDY1; Deubiquitinating enzyme MINDY-1; Protein FAM63A; 3.4.19.12; KIAA1390; MINY1_MOUSE; NF-E2 inducible protein; MINY1_RAT; MINDY lysine 48 deubiquitinase 1; family with sequence similarity 63 member A; MINDY deubiquitinase 1; MIU-containing novel DUB

family member 1; motif interacting with Ub-containing novel DUB

Dilution

WB=1:500-2000

Storage

Store at -20 °C for one year. Avoid repeated freeze/thaw cycles. When reconstituted in sterile pH 7.4 0.01M PBS or diluent of antibody the antibody is stable for at least two weeks at 2-4 °C.

Protein Information

Name

MINDY1 ([HGNC:25648](#))

Synonyms

FAM63A, KIAA1390

Function

Hydrolase that can specifically remove 'Lys-48'-linked conjugated ubiquitin from proteins. Has exodeubiquitinase activity and has a preference for long polyubiquitin chains. May play a regulatory role at the level of protein turnover.

Please note: All products are 'FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC OR THERAPEUTIC PROCEDURES'.
