

# GPI Antibody (C-term)

Affinity Purified Rabbit Polyclonal Antibody (Pab)

Catalog # AP9786b

## Product Information

---

Application	FC, WB, E
Primary Accession	<a href="#">P06744</a>
Other Accession	<a href="#">Q4R591</a>
Reactivity	Human, Rat, Mouse
Predicted	Monkey
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Clone Names	RB24626
Calculated MW	63147
Antigen Region	445-473

## Additional Information

---

Gene ID	2821
Other Names	Glucose-6-phosphate isomerase, GPI, Autocrine motility factor, AMF, Neurolleukin, NLK, Phosphoglucose isomerase, PGI, Phosphohexose isomerase, PHI, Sperm antigen 36, SA-36, GPI
Target/Specificity	This GPI antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 445-473 amino acids from the C-terminal region of human GPI.
Dilution	FC~~1:10~50 WB~~1:1000 E~~Use at an assay dependent concentration.
Format	Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.
Storage	Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.
Precautions	GPI Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

## Protein Information

---

Name	GPI {ECO:0000303   PubMed:2387591, ECO:0000312   HGNC:HGNC:4458}
Function	In the cytoplasm, catalyzes the conversion of glucose-6- phosphate to

fructose-6-phosphate, the second step in glycolysis, and the reverse reaction during gluconeogenesis (PubMed:[28803808](#)). Besides its role as a glycolytic enzyme, also acts as a secreted cytokine: acts as an angiogenic factor (AMF) that stimulates endothelial cell motility (PubMed:[11437381](#)). Acts as a neurotrophic factor, neuroleukin, for spinal and sensory neurons (PubMed:[11004567](#), PubMed:[3352745](#)). It is secreted by lectin-stimulated T-cells and induces immunoglobulin secretion (PubMed:[11004567](#), PubMed:[3352745](#)).

#### Cellular Location

Cytoplasm. Secreted

## Background

GPI belongs to the GPI family whose members encode multifunctional phosphoglucose isomerase proteins involved in energy pathways. The protein encoded by this gene is a dimeric enzyme that catalyzes the reversible isomerization of glucose-6-phosphate and fructose-6-phosphate. The protein functions in different capacities inside and outside the cell. In the cytoplasm, the gene product is involved in glycolysis and gluconeogenesis, while outside the cell it functions as a neurotrophic factor for spinal and sensory neurons. Defects in this gene are the cause of nonspherocytic hemolytic anemia and a severe enzyme deficiency can be associated with hydrops fetalis, immediate neonatal death and neurological impairment.

## Images

Western blot analysis of lysates from Ramos cell line, mouse liver, rat liver tissue (from left to right), using GPI Antibody (C-term) (Cat. #AP9786b). AP9786b was diluted at 1:1000 at each lane. A goat anti-rabbit IgG H&L (HRP) at 1:5000 dilution was used as the secondary antibody. Lysates at 35 µg per lane.

GPI Antibody (C-term) (Cat. #AP9786b) flow cytometric analysis of Ramos cells (right histogram) compared to a negative control cell (left histogram). FITC-conjugated goat-anti-rabbit secondary antibodies were used for the analysis.
