

PGP Antibody (N-term)

Affinity Purified Rabbit Polyclonal Antibody (Pab)

Catalog # AP9853a

Product Information

Application	WB, IHC-P, FC, E
Primary Accession	A6NDG6
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Clone Names	RB24904
Calculated MW	34006
Antigen Region	33-62

Additional Information

Gene ID	283871
Other Names	Phosphoglycolate phosphatase, PGP, PGPase, PGP
Target/Specificity	This PGP antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 33-62 amino acids from the N-terminal region of human PGP.
Dilution	WB~~1:1000 IHC-P~~1:100~500 FC~~1:10~50 E~~Use at an assay dependent concentration.
Format	Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.
Storage	Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.
Precautions	PGP Antibody (N-term) is for research use only and not for use in diagnostic or therapeutic procedures.

Protein Information

Name	PGP (HGNC:8909)
Function	Glycerol-3-phosphate phosphatase hydrolyzing glycerol-3- phosphate into glycerol. Thereby, regulates the cellular levels of glycerol-3-phosphate a metabolic intermediate of glucose, lipid and energy metabolism. Was also shown to have a 2-phosphoglycolate phosphatase activity and a

tyrosine-protein phosphatase activity. However, their physiological relevance is unclear (PubMed:[26755581](#)). In vitro, also has a phosphatase activity toward ADP, ATP, GDP and GTP (By similarity).

Tissue Location

Detected in all tissues including red cells, lymphocytes and cultured fibroblasts (at protein level). The highest activities occur in skeletal muscle and cardiac muscle

Images

Western blot analysis of PGP Antibody (N-term) (Cat. #AP9853a) in K562 cell line lysates (35ug/lane). PGP (arrow) was detected using the purified Pab.

PGP Antibody (N-term) (Cat. #AP9853a) IHC analysis in formalin fixed and paraffin embedded skeletal muscle followed by peroxidase conjugation of the secondary antibody and DAB staining. This data demonstrates the use of the PGP Antibody (N-term) for immunohistochemistry. Clinical relevance has not been evaluated.

PGP Antibody (N-term) (Cat. #AP9853a) flow cytometric analysis of K562 cells (right histogram) compared to a negative control cell (left histogram). FITC-conjugated goat-anti-rabbit secondary antibodies were used for the analysis.
