

Anti-CTLA-4 / CD152 Reference Antibody (Antitope patent anti-CTLA4)

Recombinant Antibody
Catalog # APR10018

Product Information

| | |
|--------------------------|----------------------------|
| Application | FC, Kinetics, Animal Model |
| Primary Accession | P16410 |
| Reactivity | Human |
| Clonality | Monoclonal |
| Isotype | IgG1 |
| Calculated MW | 24656 |

Additional Information

| | |
|----------------------------------|----------------------------------------------------------------------------------------------------------------------------------|
| Target/Specificity | CTLA-4 / CD152 |
| Endotoxin Conjugation | Unconjugated |
| Expression system | CHO Cell |
| Format | Purified monoclonal antibody supplied in PBS, pH6.0, without preservative. This antibody is purified through a protein A column. |

Protein Information

| | |
|--------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Name | CTLA4 |
| Synonyms | CD152 |
| Function | Inhibitory receptor acting as a major negative regulator of T-cell responses. The affinity of CTLA4 for its natural B7 family ligands, CD80 and CD86, is considerably stronger than the affinity of their cognate stimulatory coreceptor CD28. |
| Cellular Location | Cell membrane; Single-pass type I membrane protein. Note=Exists primarily an intracellular antigen whose surface expression is tightly regulated by restricted trafficking to the cell surface and rapid internalization |
| Tissue Location | Widely expressed with highest levels in lymphoid tissues. Detected in activated T-cells where expression levels are 30- to 50-fold less than CD28, the stimulatory coreceptor, on the cell surface following activation. |

Anti-CTLA-4 / CD152 Reference Antibody (Antitope patent anti-CTLA4) on SDS-PAGE under reducing (R) condition. The gel was stained with Coomassie Blue. The purity of the protein is greater than 90%

The purity of Anti-CTLA-4 / CD152 Reference Antibody (Antitope patent anti-CTLA4) is more than 95%, determined by SEC-HPLC.

Immobilized human CTLA 4 His at 2 µg/mL can bind Anti-CTLA-4 / CD152 Reference Antibody (Antitope patent anti-CTLA4), EC50=0.04907 µg/mL.
