

Anti-Siglec-2 / CD22 Reference Antibody (inotuzumab-MMAE)

Recombinant Antibody Catalog # APR10087

## **Product Information**

**Application** FC, Kinetics, Animal Model

Primary Accession
Reactivity
Human
Clonality
Monoclonal
Isotype
IgG4
Calculated MW
95348

## **Additional Information**

Target/Specificity Siglec-2 / CD22

**Endotoxin** 

**Conjugation** Unconjugated

**Expression system** CHO Cell

**Format** Purified monoclonal antibody supplied in PBS, pH6.0, without

preservative. This antibody is purified through a protein A column.

## **Protein Information**

Name CD22 {ECO:0000303 | PubMed:1691828, ECO:0000312 | HGNC:HGNC:1643}

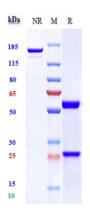

**Function** Most highly expressed siglec (sialic acid-binding immunoglobulin-like lectin)

on B-cells that plays a role in various aspects of B-cell biology including differentiation, antigen presentation, and trafficking to bone marrow (PubMed:34330755, PubMed:8627166). Binds to alpha 2,6-linked sialic acid residues of surface molecules such as CD22 itself, CD45 and IgM in a cis configuration. Can also bind to ligands on other cells as an adhesion molecule in a trans configuration (PubMed:20172905). Acts as an inhibitory coreceptor on the surface of B-cells and inhibits B-cell receptor induced signaling, characterized by inhibition of the calcium mobilization and cellular activation. Mechanistically, the immunoreceptor tyrosine-based inhibitory motif domain is phosphorylated by the Src kinase LYN, which in turn leads to the recruitment of the protein tyrosine phosphatase 1/PTPN6, leading to the negative regulation of BCR signaling (PubMed:8627166). If this negative signaling from is of sufficient strength, apoptosis of the B-cell can be induced

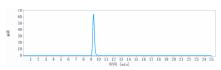

(PubMed:<u>20516366</u>).

**Cellular Location** Cell membrane; Single-pass type I membrane protein

## **Images**

Anti-Siglec-2 / CD22 Reference Antibody (inotuzumab-MMAE) on SDS-PAGE under reducing (R) condition. The gel was stained with Coomassie Blue. The purity of the protein is greater than 90%

The purity of Anti-Siglec-2 / CD22 Reference Antibody (inotuzumab-MMAE)is more than 95% ,determined by SEC-HPLC.
