Anti-GUCY2C Reference Antibody (indusatumab)

Recombinant Antibody
Catalog # APR10120

Product Information

Application	Functional assay, Kinetics (SPR), Kinetics (BLI), FACS, E, FTA
Primary Accession	P25092
Reactivity	Human
Clonality	Monoclonal
Isotype	IgG1
Calculated MW	123403

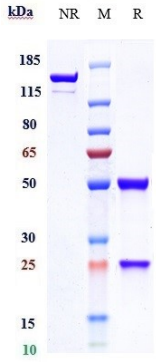

Additional Information

Target/Specificity	GUCY2C
Endotoxin Conjugation	Unconjugated
Expression system	CHO
Format	Purified monoclonal antibody supplied in PBS, pH6.0, without preservative.This antibody is purified through a protein A column.

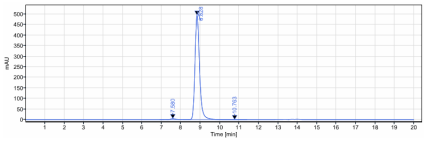

Protein Information

Name	GUCY2C {ECO:0000303|PubMed:22521417, ECO:0000312|HGNC:HGNC:4688}
Function	Guanylyl cyclase that catalyzes synthesis of cyclic GMP (cGMP) from GTP (PubMed:11950846, PubMed:1718270, PubMed:22436048, PubMed:22521417, PubMed:23269669). Receptor for the E.coli heat-stable enterotoxin; E.coli enterotoxin markedly stimulates the accumulation of cGMP in mammalian cells expressing GUCY2C (PubMed:1680854, PubMed:1718270). Also activated by the endogenous peptides guanylin and uroguanylin (PubMed:8381596).
Cellular Location	Cell membrane; Single-pass type I membrane protein Endoplasmic reticulum membrane; Single- pass type I membrane protein. Note=The 145 kDa plasma membrane form of GUCY2C contains sialic acid and galactose residues, while a differencially glycosylated 130 Kda form is a high mannose form that is resident in the endoplasmic reticulum and may serve as the precursor for the cell surface form

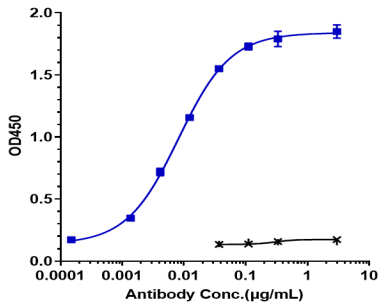

Images

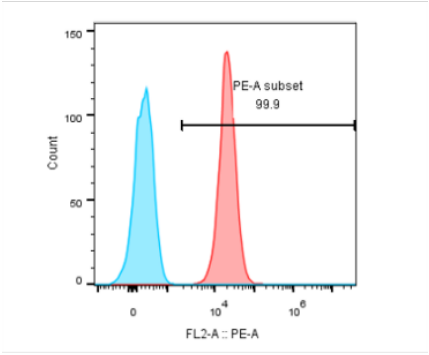

Anti-GUCY2C Reference Antibody (indusatumab) on SDS-PAGE under reducing (R) condition. The purity of the protein is greater than 95%.

The purity of Anti-GUCY2C Reference Antibody (indusatumab) is 98.5%, determined by SEC-HPLC.

Immobilized human GUCY2C His at 2 ug/mL can bind Anti-GUCY2C Reference Antibody (indusatumab), EC50=0.00818 ug/mL.

Human GUCY2C HEK293 cells were stained with Anti-GUCY2C Reference Antibody (indusatumab) and negative control protein respectively, washed and then followed by PE and analyzed with FACS.
