Anti-MSPR / RON / CD136 Reference Antibody (Aveo anti-RON)

Recombinant Antibody Catalog # APR10205

Product Information

Application FC, Kinetics, Animal Model

152241

Primary Accession Q04912 Reactivity Human Clonality Monoclonal Isotype IgG1 **Calculated MW**

Additional Information

Target/Specificity MSPR / RON / CD136

Endotoxin

Conjugation Unconjugated

Expression system CHO Cell

Format Purified monoclonal antibody supplied in PBS, pH6.0, without

preservative. This antibody is purified through a protein A column.

Protein Information

Name MST1R

Synonyms PTK8, RON

Function Receptor tyrosine kinase that transduces signals from the extracellular

> matrix into the cytoplasm by binding to MST1 ligand. Regulates many physiological processes including cell survival, migration and differentiation. Ligand binding at the cell surface induces autophosphorylation of RON on its intracellular domain that provides docking sites for downstream signaling molecules. Following activation by ligand, interacts with the PI3-kinase subunit PIK3R1, PLCG1 or the adapter GAB1. Recruitment of these downstream effectors by RON leads to the activation of several signaling cascades including the RAS-ERK, PI3 kinase-AKT, or PLCgamma-PKC. RON signaling activates the wound healing response by promoting epithelial cell migration, proliferation as well as survival at the wound site. Also plays a role in the innate immune response by regulating the migration and phagocytic activity of macrophages. Alternatively, RON can also promote signals such as cell migration and proliferation in response to growth factors other than

MST1 ligand.

Cellular Location

Membrane; Single-pass type I membrane protein.

Tissue Location

Expressed in colon, skin, lung and bone marrow.

Images

Anti-MSPR / RON / CD136 Reference Antibody (Aveo anti-RON) on SDS-PAGE under reducing (R) condition. The gel was stained with Coomassie Blue. The purity of the protein is greater than 95%

The purity of Anti-MSPR / RON / CD136 Reference Antibody (Aveo anti-RON)is more than 97.3% ,determined by SEC-HPLC.

Hs746T cells were stained with Anti-MSPR / RON / CD136 Reference Antibody (Aveo anti-RON) and negative control protein respectively, washed and then followed by PE and analyzed with FACS, EC265=45575 μ g/mL
