# Anti-HBEGF Reference Antibody (U3-1565)

Recombinant Antibody Catalog # APR10297

### **Product Information**

**Application** FC, Kinetics, Animal Model

Primary Accession <u>Q99075</u>

Reactivity Human, Mouse
Clonality Monoclonal

Isotype IgG1 Calculated MW 23067

## **Additional Information**

Target/Specificity HBEGF

**Endotoxin** 

**Conjugation** Unconjugated

**Expression system** CHO Cell

**Format** Purified monoclonal antibody supplied in PBS, pH6.0, without

preservative. This antibody is purified through a protein A column.

## **Protein Information**

Name HBEGF

**Synonyms** DTR, DTS, HEGFL

**Function** Growth factor that mediates its effects via EGFR, ERBB2 and ERBB4. Required

for normal cardiac valve formation and normal heart function. Promotes smooth muscle cell proliferation. May be involved in macrophage-mediated cellular proliferation. It is mitogenic for fibroblasts, but not endothelial cells. It is able to bind EGF receptor/EGFR with higher affinity than EGF itself and is a far more potent mitogen for smooth muscle cells than EGF. Also acts as a

diphtheria toxin receptor.

**Cellular Location** [Heparin-binding EGF-like growth factor]: Secreted, extracellular space.

Note=Mature HB-EGF is released into the extracellular space and probably

binds to a receptor

#### **Images**

Anti-HBEGF Reference Antibody (U3-1565) on SDS-PAGE under reducing (R) condition. The gel was stained with Coomassie Blue. The purity of the protein is greater than 95%
