

Anti-HBEGF Reference Antibody (KHK2866)

Recombinant Antibody

Catalog # APR10487

Product Information

Application	FC, Kinetics, Animal Model
Primary Accession	Q99075
Reactivity	Human
Clonality	Monoclonal
Isotype	IgG
Calculated MW	23067

Additional Information

Target/Specificity	HBEGF
Endotoxin	
Conjugation	Unconjugated
Expression system	CHO Cell
Format	Purified monoclonal antibody supplied in PBS, pH6.0, without preservative. This antibody is purified through a protein A column.

Protein Information

Name	HBEGF
Synonyms	DTR, DTS, HEGFL
Function	Growth factor that mediates its effects via EGFR, ERBB2 and ERBB4. Required for normal cardiac valve formation and normal heart function. Promotes smooth muscle cell proliferation. May be involved in macrophage-mediated cellular proliferation. It is mitogenic for fibroblasts, but not endothelial cells. It is able to bind EGF receptor/EGFR with higher affinity than EGF itself and is a far more potent mitogen for smooth muscle cells than EGF. Also acts as a diphtheria toxin receptor.
Cellular Location	[Heparin-binding EGF-like growth factor]: Secreted, extracellular space. Note=Mature HB-EGF is released into the extracellular space and probably binds to a receptor

Images

Anti-HBEGF Reference Antibody (KHK2866) on SDS-PAGE under reducing (R) condition. The gel was stained with Coomassie Blue. The purity of the protein is greater than 90%

The purity of Anti-HBEGF Reference Antibody (KHK2866) is more than 95% ,determined by SEC-HPLC.
