Anti-IL-6 / IFNb2 Reference Antibody (ziltivekimab)

Recombinant Antibody
Catalog # APR10604

Product Information

Application	Functional assay, Kinetics (SPR), Kinetics (BLI), FACS, E, FTA
Primary Accession	P05231
Reactivity	Human
Clonality	Monoclonal
Isotype	IgG
Calculated MW	23718

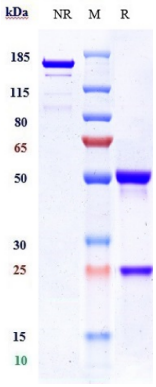

Additional Information

Target/Specificity	IL-6 / IFNb2
Endotoxin	
Conjugation	Unconjugated
Expression system	CHO
Format	Purified monoclonal antibody supplied in PBS, pH6.0, without preservative.This antibody is purified through a protein A column.

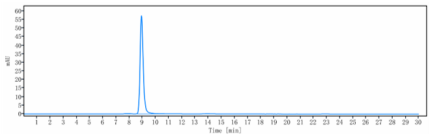

Protein Information

Name	IL6 (HGNC:6018)
Synonyms	IFNB2
Function	Cytokine with a wide variety of biological functions in immunity, tissue regeneration, and metabolism. Binds to IL6R, then the complex associates to the signaling subunit IL6ST/gp130 to trigger the intracellular IL6-signaling pathway (Probable). The interaction with the membrane-bound IL6R and IL6ST stimulates 'classic signaling', whereas the binding of IL6 and soluble IL6R to IL6ST stimulates 'trans- signaling'. Alternatively, 'cluster signaling' occurs when membrane- bound IL6:IL6R complexes on transmitter cells activate IL6ST receptors on neighboring receiver cells (Probable).
Cellular Location	Secreted.
Tissue Location	Produced by skeletal muscle.

Images

Anti-IL-6 / IFNb2 Reference Antibody (ziltivekimab) on SDS-PAGE under reducing (R) condition. The purity of the protein is greater than 90%.

The purity of Anti-IL-6 / IFNb2 Reference Antibody (ziltivekimab) is more than 95%, determined by SEC-HPLC.
