

Anti-Albumin Reference Antibody (Numab patent anti-HSA)

Recombinant Antibody
Catalog # APR10768

Product Information

Application	FC, Kinetics, Animal Model
Primary Accession	P02768
Reactivity	Human, Mouse
Clonality	Monoclonal
Isotype	IgG1
Calculated MW	69367

Additional Information

Target/Specificity	Albumin
Endotoxin Conjugation	Unconjugated
Expression system	CHO Cell
Format	Purified monoclonal antibody supplied in PBS, pH6.0, without preservative. This antibody is purified through a protein A column.

Protein Information

Name	ALB
Function	Binds water, Ca(2+), Na(+), K(+), fatty acids, hormones, bilirubin and drugs (Probable). Its main function is the regulation of the colloidal osmotic pressure of blood (Probable). Major zinc transporter in plasma, typically binds about 80% of all plasma zinc (PubMed: 19021548). Major calcium and magnesium transporter in plasma, binds approximately 45% of circulating calcium and magnesium in plasma (By similarity). Potentially has more than two calcium-binding sites and might additionally bind calcium in a non-specific manner (By similarity). The shared binding site between zinc and calcium at residue Asp-273 suggests a crosstalk between zinc and calcium transport in the blood (By similarity). The rank order of affinity is zinc > calcium > magnesium (By similarity). Binds to the bacterial siderophore enterobactin and inhibits enterobactin-mediated iron uptake of E.coli from ferric transferrin, and may thereby limit the utilization of iron and growth of enteric bacteria such as E.coli (PubMed: 6234017). Does not prevent iron uptake by the bacterial siderophore aerobactin (PubMed: 6234017).
Cellular Location	Secreted.

Plasma.

Images

Anti-Albumin Reference Antibody (Numab patent anti-HSA) on SDS-PAGE under reducing (R) condition. The gel was stained with Coomassie Blue. The purity of the protein is greater than 90%

The purity of Anti-Albumin Reference Antibody (Numab patent anti-HSA) is more than 95%, determined by SEC-HPLC.
