Anti-IL-6Ra / CD126 Reference Antibody (satralizumab-mwge)

Catalog # APR11176

Product Information

Application	Functional assay, Kinetics (SPR), Kinetics (BLI), FACS, E, FTA
Primary Accession	P08887
Reactivity	Human
Clonality	Monoclonal
Isotype	IgG2
Calculated MW	51548

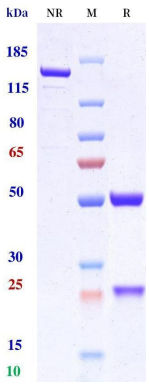

Additional Information

Target/Specificity	IL-6Ra / CD126
Expression system	CHO

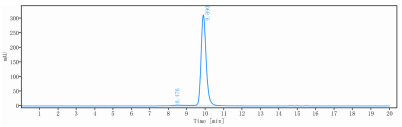

Protein Information

Name	IL6R (HGNC:6019)
Function	Part of the receptor for interleukin 6. Binds to IL6 with low affinity, but does not transduce a signal (PubMed:28265003). Signal activation necessitate an association with IL6ST. Activation leads to the regulation of the immune response, acute-phase reactions and hematopoiesis (PubMed:30995492, PubMed:31235509). The interaction with membrane-bound IL6R and IL6ST stimulates 'classic signaling', the restricted expression of the IL6R limits classic IL6 signaling to only a few tissues such as the liver and some cells of the immune system. Whereas the binding of IL6 and soluble IL6R to IL6ST stimulates 'trans- signaling'. Alternatively, 'cluster signaling' occurs when membrane- bound IL6:IL6R complexes on transmitter cells activate IL6ST receptors on neighboring receiver cells (Probable).
Cellular Location	[Isoform 1]: Cell membrane {ECO:0000250|UniProtKB:P22272}; Single-pass type I membrane protein [Soluble interleukin-6 receptor subunit alpha]: Secreted
Tissue Location	[Isoform 2]: Expressed in peripheral blood mononuclear cells and weakly found in urine and serum. 1%-20% of the total sIL6R in plasma is generated by alternative splicing (PubMed:28060820).

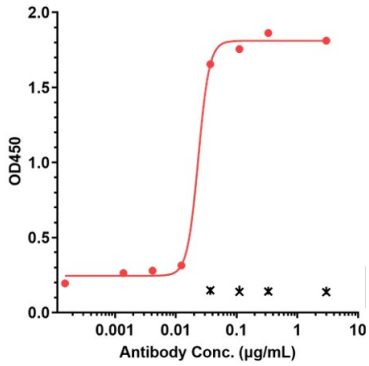

Images

Anti-IL-6Ra / CD126 Reference Antibody (satralizumab-mwge) on SDS-PAGE under reducing (R) condition. The purity of the protein is greater than 95%.

The purity of Anti-IL-6Ra / CD126 Reference Antibody (satralizumab-mwge) is 97%, determined by SEC-HPLC.

Immobilized hIL-6R-his at 2 μg/mL can bind satralizumab-mwge, EC50= 0.02341 μg/mL.

Please note: All products are 'FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC OR THERAPEUTIC PROCEDURES'.
