

TRIM25 Antibody

Catalog # ASC10576

Product Information

| | |
|------------------------------|--|
| Application | WB, IF, ICC, E |
| Primary Accession | Q14258 |
| Other Accession | NP_005073 , 68160937 |
| Reactivity | Human, Mouse |
| Host | Rabbit |
| Clonality | Polyclonal |
| Isotype | IgG |
| Calculated MW | 70973 |
| Concentration (mg/ml) | 1 mg/mL |
| Conjugate | Unconjugated |
| Application Notes | TRIM25 antibody can be used for detection of TRIM25 by Western blot at 1 μ g/mL. Antibody can also be used for immunocytochemistry starting at 20 μ g/mL. For immunofluorescence start at 20 μ g/mL. |

Additional Information

| | |
|-------------------------------------|--|
| Gene ID | 7706 |
| Other Names | E3 ubiquitin/ISG15 ligase TRIM25, 6.3.2.19, 6.3.2.n3, Estrogen-responsive finger protein, RING finger protein 147, Tripartite motif-containing protein 25, Ubiquitin/ISG15-conjugating enzyme TRIM25, Zinc finger protein 147, TRIM25, EFP, RNF147, ZNF147 |
| Target/Specificity | TRIM25; |
| Reconstitution & Storage | TRIM25 antibody can be stored at 4°C for three months and -20°C, stable for up to one year. As with all antibodies care should be taken to avoid repeated freeze thaw cycles. Antibodies should not be exposed to prolonged high temperatures. |
| Precautions | TRIM25 Antibody is for research use only and not for use in diagnostic or therapeutic procedures. |

Protein Information

| | |
|-----------------|--|
| Name | TRIM25 |
| Synonyms | EFP {ECO:0000303 PubMed:8248217}, RNF147 |
| Function | Functions as a ubiquitin E3 ligase and as an ISG15 E3 ligase (PubMed: 16352599). Involved in innate immune defense against viruses by mediating ubiquitination of RIGI and IFIH1 (PubMed: 17392790 , PubMed: 29357390 , PubMed: 30193849 , PubMed: 31710640 , PubMed: 33849980 , PubMed: 36045682). Mediates 'Lys-63'-linked |

polyubiquitination of the RIGI N-terminal CARD-like region and may play a role in signal transduction that leads to the production of interferons in response to viral infection (PubMed:[17392790](#), PubMed:[23950712](#)). Mediates 'Lys-63'- linked polyubiquitination of IFIH1 (PubMed:[30193849](#)). Promotes ISGylation of 14-3-3 sigma (SFN), an adapter protein implicated in the regulation of a large spectrum signaling pathway (PubMed:[16352599](#), PubMed:[17069755](#)). Mediates estrogen action in various target organs (PubMed:[22452784](#)). Mediates the ubiquitination and subsequent proteasomal degradation of ZFHX3 (PubMed:[22452784](#)). Plays a role in promoting the restart of stalled replication forks via interaction with the KHDC3L-OOEP scaffold and subsequent ubiquitination of BLM, resulting in the recruitment and retainment of BLM at DNA replication forks (By similarity). Plays an essential role in the antiviral activity of ZAP/ZC3HAV1; an antiviral protein which inhibits the replication of certain viruses. Mechanistically, mediates 'Lys-63'- linked polyubiquitination of ZAP/ZC3HAV1 that is required for its optimal binding to target mRNA (PubMed:[28060952](#), PubMed:[28202764](#)). Also mediates the ubiquitination of various substrates implicated in stress granule formation, nonsense-mediated mRNA decay, nucleoside synthesis and mRNA translation and stability (PubMed:[36067236](#)).

Cellular Location Cytoplasm. Cytoplasm, Stress granule. Nucleus
{ECO:0000250|UniProtKB:Q61510}

Tissue Location Expressed in breast tumors (at protein level). Ubiquitous.

Background

TRIM25 Antibody: TRIM25, also known as estrogen responsive finger protein (EFP) is a member of the RING finger-B box-coiled coil family and is a downstream target of estrogen receptor α . Mice lacking this gene displayed an underdeveloped uterus and reduced estrogen responsiveness demonstrating that this protein is essential for estrogen dependent proliferation. TRIM25 expression is increased in breast carcinoma where it promotes the growth of breast tumor by functioning as an E3 ubiquitin ligase that targets the negative cell cycle checkpoint 14-3-3s. Recent reports have indicated that TRIM25 E3 ubiquitin ligase is essential for the retinoic-acid-inducible gene 1 (RIG-1) signaling pathway to elicit host antiviral innate immunity.
