

# Slitrk2 Antibody

Catalog # ASC10639

## Product Information

---

<b>Application</b>	WB, IF, E, IHC-P
<b>Primary Accession</b>	<a href="#">Q9H156</a>
<b>Other Accession</b>	<a href="#">Q9H156</a> , <a href="#">46397026</a>
<b>Reactivity</b>	Human, Mouse, Rat
<b>Host</b>	Rabbit
<b>Clonality</b>	Polyclonal
<b>Isotype</b>	IgG
<b>Calculated MW</b>	95404
<b>Concentration (mg/ml)</b>	1 mg/mL
<b>Conjugate</b>	Unconjugated
<b>Application Notes</b>	Slitrk2 antibody can be used for detection of Slitrk2 by Western blot at 1 - 2 $\mu$ g/mL. Antibody can also be used for immunohistochemistry starting at 2.5 $\mu$ g/mL. For immunofluorescence start at 20 $\mu$ g/mL.

## Additional Information

---

<b>Gene ID</b>	84631
<b>Other Names</b>	SLIT and NTRK-like protein 2, SLTRK2, CXorf2, KIAA1854, SLTL1
<b>Target/Specificity</b>	SLTRK2; This antibody is predicted to have no cross-reactivity to other Slitrk proteins.
<b>Reconstitution &amp; Storage</b>	Slitrk2 antibody can be stored at 4°C for three months and -20°C, stable for up to one year. As with all antibodies care should be taken to avoid repeated freeze thaw cycles. Antibodies should not be exposed to prolonged high temperatures.
<b>Precautions</b>	Slitrk2 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

## Protein Information

---

<b>Name</b>	SLTRK2
<b>Synonyms</b>	CXorf2, KIAA1854, SLTL1
<b>Function</b>	It is involved in synaptogenesis and promotes excitatory synapse differentiation (PubMed: <a href="#">27273464</a> , PubMed: <a href="#">27812321</a> , PubMed: <a href="#">35840571</a> ). Suppresses neurite outgrowth (By similarity). Involved in the negative regulation of NTRK2 (PubMed: <a href="#">35840571</a> ).
<b>Cellular Location</b>	Membrane; Single-pass type I membrane protein. Cell membrane. Cell projection, dendrite

## Tissue Location

Expressed predominantly in the cerebral cortex of the brain but also at low levels in the spinal cord and medulla. Also expressed in some astrocytic brain tumors such as astrocytomas, oligodendrogiomas, glioblastomas, gangliogliomas and primitive neuroectodermal tumors.

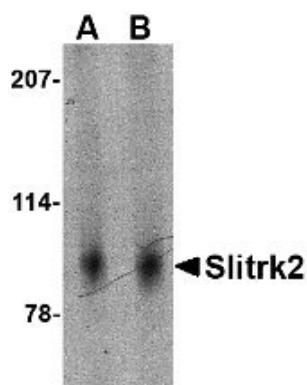

## Background

Slitrk2 Antibody: SLIT and NTRK-like family 2 (Slitrk2) is a member a protein family consisting of six homologous transmembrane proteins (Slitrk1-6) that share two conserved leucine-rich repeat domains in the extracellular domain and have significant homology to Slit, a secreted axonal growth-controlling protein. These proteins are also homologous to trk neurotrophin receptors in their intracellular domains. Expression of Slitrk proteins is highly restricted to neural and brain tumor tissues, but varies within the family. For example, Slitrk2 is expressed primarily in neurons in the ventricular layer of the brain. Like every other Slitrk protein except Slitrk1, overexpression of Slitrk2 inhibited neurite outgrowth in cultured neurons. Deletion analysis indicated that the functional difference between Slitrk2 and Slitrk1 is within their intracellular domains. At least two isoforms of this protein are known to exist.
