

NUP107 Antibody

Catalog # ASC10729

Product Information

| | |
|------------------------------|--|
| Application | WB, IF, ICC, E |
| Primary Accession | P57740 |
| Other Accession | P57740 , 12230339 |
| Reactivity | Human, Mouse, Rat |
| Host | Rabbit |
| Clonality | Polyclonal |
| Isotype | IgG |
| Calculated MW | 106374 |
| Concentration (mg/ml) | 1 mg/mL |
| Conjugate | Unconjugated |
| Application Notes | NUP107 antibody can be used for detection of NUP107 by Western blot at 1 - 2 μ g/mL. Antibody can also be used for immunocytochemistry starting at 10 μ g/mL. For immunofluorescence start at 10 μ g/mL. |

Additional Information

| | |
|-------------------------------------|--|
| Gene ID | 57122 |
| Other Names | Nuclear pore complex protein Nup107, 107 kDa nucleoporin, Nucleoporin Nup107, NUP107 |
| Target/Specificity | NUP107; |
| Reconstitution & Storage | NUP107 antibody can be stored at 4°C for three months and -20°C, stable for up to one year. As with all antibodies care should be taken to avoid repeated freeze thaw cycles. Antibodies should not be exposed to prolonged high temperatures. |
| Precautions | NUP107 Antibody is for research use only and not for use in diagnostic or therapeutic procedures. |

Protein Information

| | |
|--------------------------|---|
| Name | NUP107 |
| Function | Plays a role in the nuclear pore complex (NPC) assembly and/or maintenance (PubMed: 12552102 , PubMed: 15229283 , PubMed: 30179222). Required for the assembly of peripheral proteins into the NPC (PubMed: 12552102 , PubMed: 15229283). May anchor NUP62 to the NPC (PubMed: 15229283). Involved in nephrogenesis (PubMed: 30179222). |
| Cellular Location | Nucleus membrane. Nucleus, nuclear pore complex. Chromosome, centromere, kinetochore. Note=Located on both the cytoplasmic and nuclear sides of the NPC core structure (PubMed:11564755). During mitosis, localizes |

to the kinetochores (PubMed:11564755). Dissociates from the disassembled NPC structure late during prophase of mitosis (PubMed:11564755)

Tissue Location

Ubiquitously expressed in fetal and adult tissues.

Background

NUP107 Antibody: The nuclear pore complex (NPC) is a protein assembly localized at the nuclear rim and mediates macromolecular transport between the nucleus and the cytoplasm. The mammalian nucleoporin (NUP)-107 is part of the hetero-oligomeric complex that also contains NUP160, NUP133, NUP96, and mammalian homolog of yeast sec13p. While the majority of the NUP107-160 nuclear pore sub-complex localizes to the nuclear pore, a small fraction is observed at kinetochores and pro-metaphase spindle poles in mitotic cells in association with proteins such as Mad1, Mad2, Bub3 and Cdc20. Immunodepletion of the NUP107-160 complex resulted in defective spindle assembly indicating that it has multiple functions. NUP107 has recently been identified as an HIV dependency factor (HDF), suggesting that NUP107 may be an important drug target in HIV treatment. Multiple isoforms of NUP107 are known to exist.
