

TMEM214 Antibody

Catalog # ASC10958

Product Information

Application	WB, E
Primary Accession	<u>Q6NUQ4</u>
Other Accession	<u>NP_060197</u> , <u>134152721</u>
Reactivity	Human, Mouse, Rat
Host	Rabbit
Clonality	Polyclonal
Isotype	IgG
Calculated MW	77151
Concentration (mg/ml)	1 mg/mL
Conjugate	Unconjugated
Application Notes	TMEM214 antibody can be used for detection of TMEM214 by Western blot at 1 - 2 □g/mL.

Additional Information

Gene ID Other Names	54867 Transmembrane protein 214, TMEM214
Target/Specificity	TMEM214;
Reconstitution & Storage	TMEM214 antibody can be stored at 4°C for three months and -20°C, stable for up to one year. As with all antibodies care should be taken to avoid repeated freeze thaw cycles. Antibodies should not be exposed to prolonged high temperatures.
Precautions	TMEM214 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

Protein Information

Name	TMEM214
Function	Critical mediator, in cooperation with CASP4, of endoplasmic reticulum-stress induced apoptosis. Required or the activation of CASP4 following endoplasmic reticulum stress.
Cellular Location	Endoplasmic reticulum membrane; Multi-pass membrane protein

Background

TMEM214 Antibody: Transmembrane protein 214 (TMEM214) is a 77kD membrane protein which is widely

expressed at high level. The gene encoding this protein maps to chromosome 2, at 2p23.3 TMEM214 interacts with LSM1, an SM-like protein, forming a stable heteromer present in tri-snRNP particles, which are important for pre-mRNA splicing. The detailed function of TMEM214 is still unknown, but a recent study showed that TMEM214 may be used to explore the contribution of human host factors of some infectious diseases such as Dengue fever, West Nile fever and yellow fever. Multiple isoforms of TMEM214 are known to exist.
