TCTN2 Antibody

Catalog # ASC11162

Product Information

Application	WB, E
Primary Accession	Q96GX1
Other Accession	NP_079085, 31377681
Reactivity	Human, Mouse
Host	Rabbit
Clonality	Polyclonal
Isotype	IgG
Calculated MW	76871
Concentration (mg/ml)	1 mg/mL
Conjugate	Unconjugated
Application Notes	TCTN2 antibody can be used for detection of TCTN2 by Western blot at 1 g/mL.

Additional Information

Gene ID	79867
Other Names	Tectonic-2, TCTN2, C12orf38, TECT2
Target/Specificity	TCTN2;
Reconstitution & Storage	TCTN2 antibody can be stored at 4℃ for three months and -20℃, stable for up to one year. As with all antibodies care should be taken to avoid repeated freeze thaw cycles. Antibodies should not be exposed to prolonged high temperatures.
Precautions	TCTN2 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

Protein Information

Name	TCTN2
Synonyms	C12orf38, TECT2
Function	Component of the tectonic-like complex, a complex localized at the transition zone of primary cilia and acting as a barrier that prevents diffusion of transmembrane proteins between the cilia and plasma membranes. Required for hedgehog signaling transduction (By similarity).
Cellular Location	Membrane; Single-pass type I membrane protein. Cytoplasm, cytoskeleton, cilium basal body. Note=Localizes at the transition zone, a region between the basal body and the ciliary axoneme.

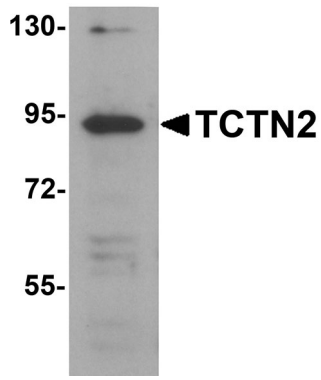

Background

TCTN2 Antibody: TCTN2 is a member of the Tectonic protein family, a group of evolutionarily conserved secreted and transmembrane proteins that regulate the Hedgehog (Hh)-mediated patterning of the neural tube. While the expression pattern and function of TCTN2 is not known, it is 49% similar to TCTN1. TCTN1 is expressed during embryonic development in regions that participate in Hh signaling, beginning in the gastrulation stages in the ventral node. Mice expressing mutant TCTN1 die between E13.5 and E16.5 and display holoprosencephaly, a defect associated with reduced Hh signaling, indicating the role of TCTN1 as an Hh activator. At later stages in development, TCTN1 is thought to also act as a repressor on the Hh pathway in the anterior and posterior neural tube.
