

SARS-CoV-2 (COVID-19) NSP6 Antibody

Catalog # ASC12090

Product Information

Application	E
Other Accession	YP_009742613.1
Host	Rabbit
Clonality	Polyclonal
Isotype	IgG
Clone Names	Non-structural protein 6

Additional Information

Gene ID	43740578
Alias Symbol	Non-structural protein 6
Other Names	NSP6

Reconstitution & Storage SARS-CoV-2 (COVID-19) NSP6 antibody can be stored at 4 °C for three months and -20 °C, stable for up to one year. As with all antibodies care should be taken to avoid repeated freeze thaw cycles. Antibodies should not be exposed to prolonged high temperatures.

Precautions SARS-CoV-2 (COVID-19) NSP6 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

Background

Coronavirus disease 2019 (COVID-19), formerly known as 2019-nCoV acute respiratory disease, is an infectious disease caused by SARS-CoV-2, a virus closely related to the SARS virus (1). The disease is the cause of the 2019–20 coronavirus outbreak (2). The structure of 2019-nCoV consists of the following: a spike protein (S), hemagglutinin-esterase dimer (HE), a membrane glycoprotein (M), an envelope protein (E) a nucleocapsid protein (N) and RNA. NSP6 plays a role in the initial induction of autophagosomes from host reticulum endoplasmic. Later, it limits the expansion of these phagosomes that are no longer able to deliver viral components to lysosomes (3,4).
