

# HeV/NiV F/Fusion glycoprotein F0 Antibody [5B3]

Catalog # ASC12258

## Product Information

---

|                              |                               |
|------------------------------|-------------------------------|
| <b>Application</b>           | E, Neut                       |
| <b>Primary Accession</b>     | <a href="#">O89342/Q9IH63</a> |
| <b>Host</b>                  | Mouse                         |
| <b>Clonality</b>             | Recombinant Monoclonal        |
| <b>Isotype</b>               | IgG1, kappa                   |
| <b>Clone Names</b>           | 5B3                           |
| <b>Concentration (mg/ml)</b> | batch dependent               |
| <b>Conjugate</b>             | Unconjugated                  |

## Additional Information

---

|                                     |                                                                                                                                                               |
|-------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Gene ID</b>                      | 1446467/920954                                                                                                                                                |
| <b>Other Names</b>                  | F, Fusion glycoprotein F0, Protein F, Nipah Virus (NiV) / Hendra Virus (HeV), 5B3, h5B3.1.                                                                    |
| <b>Reconstitution &amp; Storage</b> | Use a manual defrost freezer and avoid repeated freeze thaw cycles. Store at 2 to 8 °C for 1-2 weeks. Store at -80 °C for 12 months from the date of receipt. |
| <b>Precautions</b>                  | HeV/NiV F/Fusion glycoprotein F0 Antibody [5B3] is for research use only and not for use in diagnostic or therapeutic procedures.                             |
