

Control Rabbit IgG For Western Blot

Catalog # ASR1006

Product Information

Description Control Rabbit IgG for Western Blot

Conjugate Unconjugated

Physical State Liquid (sterile filtered)

Buffer 0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2

Stabilizer 50% (v/v) Glycerol

Preservative 0.01% (w/v) Sodium Azide and 0.01% (w/v) Gentamicin Sulfate

Additional Information

Shipping Condition Ambient

Application Note This product is a normal IgG control for use with Rockland Colorimetric

Western Blot Kit: TMB/DAB Substrate Kit for Western Blot using Rabbit Primary Antibody (Catalog number KIA003). See Kit insert for complete

instructions.

Purity This product was prepared from normal Rabbit serum by a multi-stage

process which includes delipidation, salt fractionation and ion exchange chromatography. Assay by immunoelectrophoresis resulted in a single

precipitin arc against anti-Rabbit IgG and anti-Rabbit Serum.

Storage Condition See kit insert for complete instructions.

Precautions NoteThis product is for research use only and is not intended for therapeutic or

diagnostic applications.

Please note: All products are 'FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC OR THERAPEUTIC PROCEDURES'.
