Application Note Anti-Chicken serum antibody is suitable for western blotting, IP and for

ELISA. Researchers should determine optimal titers for applications that are

not stated below.

Purity Anti-Chicken serum antibody was prepared from polyspecific antiserum by a

delipidation and defibrination. Assay by immunoelectrophoresis resulted in

multiple precipitin arcs against Chicken Serum.

Storage Condition Store vial at 4° C prior to restoration. For extended storage aliquot contents

and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only

prior to immediate use.

Precautions NoteThis product is for research use only and is not intended for therapeutic or

diagnostic applications.

Background

Anti-Chicken serum antibody detects chicken serum proteins. Serum proteins are those proteins remaining in portion of plasma after coagulation of blood, during which process the plasma protein fibrinogen is converted to fibrin and remains behind in the clot. Anti-Bovine serum antibody is ideal for investigators

involved in Cell Signaling, cellular biology and Signal Transduction research.
