Application Note Anti-RAT IgG (H&L) (GOAT) Antibody is suitable for immunomicroscopy and

flow cytometry or FACS analysis as well as other antibody based fluorescent assays requiring extremely low background levels, absence of F(c) mediated binding, lot-to-lot consistency, high titer and specificity. Specific conditions

should be optimized by user.

Purity Anti-RAT IgG (H&L) (GOAT) Antibody was prepared from monospecific

antiserum by immunoaffinity chromatography using Rat IgG coupled to agarose beads followed by solid phase adsorption(s) to remove any unwanted reactivities. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Goat Serum, Rat IgG and Rat Serum. No reaction was observed against Bovine, Chicken, Goat, Guinea Pig, Hamster, Horse, Human,

Mouse, Rabbit and Sheep Serum Proteins.

Storage Condition Store vial at 4° C prior to opening. This product is stable for several weeks

at 4° C as an undiluted liquid. Dilute only prior to immediate use. For extended storage aliquot contents and freeze at -20° C or below. Avoid

cycles of freezing and thawing.

Precautions Note This product is for research use only and is not intended for therapeutic or

diagnostic applications.

Background

RAT IgG (H&L) (GOAT) Antibody was generated in goat detects specifically Rat IgG whole molecule. Anti-Rat IgG antibosy is ideal for investigators involved in serum protein component research.
