Application Note Anti-FERRET IgG (gamma chain) (GOAT) Antibody is suitable for

immunoblotting (western or dot blot), ELISA, and immunohistochemistry requiring extremely low background levels, lot-to-lot consistency, high titer

and specificity.

Purity Anti-FERRET IgG (gamma chain) (GOAT) Antibody was prepared from

monospecific antiserum by immunoaffinity chromatography using Ferret IgG coupled to agarose beads followed by solid phase adsorption(s) to remove any unwanted reactivities. Anti-FERRET IgG (gamma chain) (GOAT) Antibody assay by immunoelectrophoresis resulted in a single precipitin arc against anti-biotin, anti-Goat Serum, Ferret IgG and Ferret Serum. No reaction was

observed against Ferret IgA or Ferret IgM.

Storage Condition Store vial at 4° C prior to restoration. For extended storage aliquot

contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted

liquid. Dilute only prior to immediate use.

Precautions NoteThis product is for research use only and is not intended for therapeutic or

diagnostic applications.

Background

Anti-FERRET IgG (gamma chain) (GOAT) Antibody generated in goat detects specifically Ferret IgG gamma chain. Ferret antibody is ideal for investigators involved in Serum Protein Component research.
