

## Anti-Human IgG (gamma chain) (Fluorescein Conjugated) Secondary Antibody

Rabbit Polyclonal, Fluorescein (FITC) Catalog # ASR2181

## **Product Information**

| Description                  | Anti-HUMAN IgG (gamma chain) (RABBIT) Antibody Fluorescein Conjugated  |
|------------------------------|--|
| Host                         | Rabbit   |
| Conjugate                    | Fluorescein (FITC)   |
| FP Value                     | 2.9 moles Fluorescein (FITC) per mole of IgG                           |
| Target Species               | Human  |
| Clonality                    | Polyclonal   |
| Physical State               | Lyophilized  |
| Host Isotype                 | IgG  |
| Target Isotype               | IgG (gamma chain)  |
| Buffer                       | 0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2             |
| Immunogen                    | Human IgG gamma heavy chain  |
| Reconstitution Volume        | 1.0 mL   |
| <b>Reconstitution Buffer</b> | Restore with deionized water (or equivalent)                           |
| Stabilizer                   | 10 mg/mL Bovine Serum Albumin (BSA) - Immunoglobulin and Protease free |
| Preservative                 | 0.01% (w/v) Sodium Azide   |

## **Additional Information**

| Shipping Condition | Ambient  |
|--------------------|--|
| Purity             | This product was prepared from monospecific antiserum by immunoaffinity<br>chromatography using Human IgG coupled to agarose beads followed by<br>solid phase adsorption(s) to remove any unwanted reactivities. Assay by<br>immunoelectrophoresis resulted in a single precipitin arc against<br>anti-Fluorescein, anti-Rabbit Serum, Human IgG and Human Serum. No<br>reaction was observed against Human IgA or Human IgM. Specificity was<br>confirmed by ELISA minimal cross reactivity against other Human heavy or<br>light chain isotypes. |
| Storage Condition  | Store vial at 4° C prior to restoration. For extended storage aliquot<br>contents and freeze at -20° C or below. Avoid cycles of freezing and<br>thawing. Centrifuge product if not completely clear after standing at room<br>temperature. This product is stable for several weeks at 4° C as an undiluted<br>liquid. Dilute only prior to immediate use.  |
| Precautions Note   | This product is for research use only and is not intended for therapeutic or diagnostic applications.  |
| Background         |  |

This product is designed for immunofluorescence microscopy, fluorescence based plate assays (FLISA) and fluorescent western blotting. This product is also suitable for multiplex analysis, including multicolor imaging, utilizing various commercial platforms.

Please note: All products are 'FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC OR THERAPEUTIC PROCEDURES'.
