Additional Information

Shipping Condition	Wet Ice
Application Note	Anti-Rabbit IgG antibody is suitable for ELISA, Western Blot and immunohistochemistry applications. Specific conditions for reactivity should be optimized by the researcher.
Purity	Anti-Rabbit IgG Antibody Alkaline Phosphatase Conjugated was prepared from monospecific antiserum by immunoaffinity chromatography using Rabbit IgG coupled to agarose beads followed by solid phase adsorption(s) to remove any unwanted reactivities. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Alkaline Phosphatase (calf intestine), anti-Sheep Serum, Rabbit IgG and Rabbit Serum.
Storage Condition	Store vial at 4° C before opening. DO NOT FREEZE. This product is stable at 4° C as an undiluted liquid. Dilute only prior to immediate use. Freezing alkaline phosphatase conjugates will result in a substantial loss of enzymatic activity.
Precautions Note	This product is for research use only and is not intended for therapeutic or diagnostic applications.

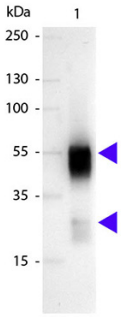

Background

Rabbit IgG antibody detects rabbit IgG whole molecule heavy and light chain components. Anti-Rabbit IgG antibody is ideal for researchers using immunoassays with rabbit primary antibody reagents.
