**Application Note** Antibody Anti-Goat IgG (H&L) peroxidase conjugated is suitable for

immunoblotting (western or dot blot), ELISA, immunoperoxidase electron microscopy and immunohistochemistry as well as other peroxidase-antibody

based enzymatic assays requiring lot-to-lot consistency.

**Purity** This product was prepared from monospecific antiserum by immunoaffinity

chromatography using Goat IgG coupled to agarose beads followed by solid

phase adsorption(s) to remove any unwanted reactivities. Assay by immunoelectrophoresis resulted in a single precipitin arc against

anti-Peroxidase, anti-Rabbit Serum, Goat IgG and Goat Serum. No reaction

was observed against Human Serum Proteins.

**Storage Condition** Store vial at 4° C prior to restoration. For extended storage aliquot

contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted

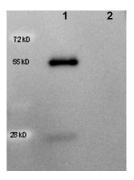

liquid. Dilute only prior to immediate use.

This product is for research use only and is not intended for therapeutic or diagnostic applications.

## **Background**

Anti-Goat IgG (H&L) peroxidase conjugated antibody generated in rabbit detects specifically goat IgG. This secondary peroxidase conjugated antibody anti-goat is ideal for investigators who routinely perform titration assays, western-blot, immunoprecipitation and more generally immunoassays.
