Application Note Suitable for immunoblotting, ELISA, immunohistochemistry,

immunomicroscopy as well as other antibody based assays using streptavidin or avidin conjugates requiring extremely low background levels, absence of F(c) mediated binding, lot-to-lot consistency, high titer and specificity.

Purity This product was prepared from monospecific antiserum by immunoaffinity

chromatography using Guinea Pig IgG coupled to agarose beads followed by solid phase adsorption(s) to remove any unwanted reactivities, papain

digestion and chromatographic separation. Assay by

immunoelectrophoresis resulted in a single precipitin arc against anti-Biotin and anti-Goat Serum. No reaction was observed against anti-Papain or

anti-Goat IgG F(c).

Storage Condition Store vial at 4° C prior to restoration. For extended storage aliquot
