Application Note This product has been assayed against 1.0 g of Human IgG in a standard

> capture ELISA using pNPP p-nitrophenyl phosphate code # NPP-10 as a substrate for 30 minutes at room temperature. A working dilution of 1:4,000 to 1:20,000 of the reconstitution concentration is suggested for this product.

This product was prepared from monospecific antiserum by immunoaffinity **Purity**

> chromatography using Human IgG coupled to agarose beads followed by solid phase adsorption(s) to remove any unwanted reactivities, pepsin

digestion and chromatographic separation. Assay by

immunoelectrophoresis resulted in a single precipitin arc against anti-Alkaline Phosphatase, anti-Goat Serum, Human IgG, Human IgG F(ab')2 and Human Serum. No reaction was observed against anti-Pepsin, anti-Goat IgG F(c), Human IgG F(c) or Bovine, Horse, Mouse and Rat Serum Proteins.

Store vial at 4° C before opening. DO NOT FREEZE. This product is stable at Storage Condition

> 4° C as an undiluted liquid. Dilute only prior to immediate use. Freezing alkaline phosphatase conjugates will result in a substantial loss of enzymatic

activity.

Precautions Note This product is for research use only and is not intended for therapeutic or

diagnostic applications.
