Application Note F(ab) Anti-Rabbit IgG (H&L) Antibody is suitable for immunoblotting (western

or dot blot), ELISA, immunoperoxidase electron microscopy and

immunohistochemistry as well as other peroxidase-antibody based enzymatic assays requiring extremely low background levels, absence of F(c) mediated

binding, lot-to-lot consistency, high titer and specificity.

Purity F(ab) Anti-Rabbit IgG (H&L) was prepared from monospecific antiserum by

immunoaffinity chromatography using Rabbit IgG coupled to agarose beads followed by solid phase adsorption(s) to remove any unwanted reactivities,

papain digestion and chromatographic separation. Assay by immunoelectrophoresis resulted in a single precipitin arc against

anti-Peroxidase and anti-Rabbit Serum. No reaction was observed against

anti-Papain or anti-Donkey IgG F(c).

Storage Condition Store vial at 4° C prior to restoration. For extended storage aliquot

contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted

liquid. Dilute only prior to immediate use.

Precautions NoteThis product is for research use only and is not intended for therapeutic or

diagnostic applications.

Background

F(ab) Anti-Rabbit IgG IgG (H&L) antibody generated in Donkey detects specifically Rabbit IgG whole molecule. This F(ab) Anti-Rabbit IgG Secondary Antibody is ideal for investigators who routinely perform ELISA, Sandwich ELISA, titration assays, western-blot, immunoprecipitation and more generally immunoassays. F(ab) Anti-Rabbit IgG (H&L) Antibody is ideal for investigators in Immunology, Cancer, and Microbiology research.
