**Purity** This product was prepared from monospecific antiserum by immunoaffinity

chromatography using Mouse antigens coupled to agarose beads followed by solid phase adsorption(s) to remove any unwanted reactivities. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Alkaline Phosphatase (calf intestine) and anti-Goat Serum. No reaction was observed against bovine, horse or human serum proteins. This reagent is suitable for the detection of all Mouse immunglobulin isotypes, subclasses and chain

combinations.

**Storage Condition** Store vial at 4° C before opening. DO NOT FREEZE. This product is stable at

4° C as an undiluted liquid. Dilute only prior to immediate use. Freezing alkaline phosphatase conjugates will result in a substantial loss of enzymatic

activity.
