Anti-Ferret IgG IgA IgM (H&L) (Peroxidase Conjugated) Secondary Antibody

Goat Polyclonal, Peroxidase (Horseradish) Catalog # ASR3011

Product Information

Anti-FERRET IgG IgA IgM (H&L) (GOAT) Antibody Peroxidase Conjugated **Description**

Host Goat

Peroxidase (Horseradish) Conjugate

Target Species Ferret Clonality Polyclonal **Physical State** Lyophilized **Host Isotype**

IgG

Target Isotype IgG IgA IgM

Buffer 0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2

Anti-Ferret IgG IgA and IgM whole molecule was produced by repeated **Immunogen**

immunization with Ferret IgG IgA and IgM whole molecules in goat.

Reconstitution Volume

Reconstitution Buffer Restore with deionized water (or equivalent)

Stabilizer 10 mg/mL Bovine Serum Albumin (BSA) - Immunoglobulin and Protease free

Preservative 0.01% (w/v) Thimerosal

Additional Information

Shipping Condition Ambient

Application Note Anti-Ferret IgG IgA and IgM whole molecule antibody is suitable for use in

> immunoelectrophoresis, western-blot, competitive western-blot, ELISA and competitive ELISA assays. Specific conditions for reactivity and signal

detection should be optimized by the end user.

Purity This product was prepared from polyspecific antiserum by immunoaffinity

> chromatography using antigens coupled to agarose beads. Assay by immunoelectrophoresis resulted in a single precipitin arc against

anti-Peroxidase, anti-Goat Serum, Ferret IgG, Ferret IgA and Ferret IgM. This reagent is suitable for the detection of all Ferret immunoglobulin subclasses

and chain combinations.

Storage Condition Store vial at 4° C prior to restoration. For extended storage aliquot

> contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted

liquid. Dilute only prior to immediate use.

Precautions Note This product is for research use only and is not intended for therapeutic or

diagnostic applications.

Background

Anti-Ferret IgG IgA and IgM whole molecule antibody generated in goat detects specifically Ferret IgG IgA and IgM whole molecules. This secondary antibody anti-Ferret is ideal for investigators who routinely perform ELISA, Sandwich ELISA, titration assays, western-blot, immunoprecipitation and more generally immunoassays.

Please note: All products are 'FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC OR THERAPEUTIC PROCEDURES'.
