F(ab')2 Anti-Fragment Of Hamster IgG (H&L) Pre-Adsorbed Secondary Antibody

Goat Polyclonal, Unconjugated Catalog # ASR3031

Product Information

Description F(ab')2 Fragment of Affinity Purified Anti-GOLDEN SYRIAN & ARMENIAN

HAMSTER IgG (H&L) (GOAT) Antibody (Min X MOUSE and RAT Serum Proteins)

Host Goat

Conjugate Unconjugated

Target Species Armenian and Golden Syrian Hamster

Clonality Polyclonal

Physical State Liquid (sterile filtered)
Host Isotype IgG F(ab')2
Target Isotype IgG (H&L)

Buffer 0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2 Immunogen Golden Syrian and Armenian Hamster IgG whole molecules

Stabilizer None

Preservative 0.01% (w/v) Sodium Azide

Additional Information

Shipping Condition Wet Ice

Application Note Suitable for immunomicroscopy and flow cytometry or FACS analysis as well

as other antibody based fluorescent assays requiring extremely low background levels, absence of F(c) mediated binding, lot-to-lot consistency, high titer and specificity. The maximum amount of reagent required to stain 1 x 10E6 cells in flow cytometry is approximately 1.0 $\,\Box\!g$ of antibody. Lesser amounts of reagent may be sufficient for staining. Optimal titers for other applications should be determined by the researcher. As a general guideline

dilutions of 1:100 to 1:250 should be suitable for most applications.

Purity This product was prepared from monospecific antiserum by immunoaffinity

chromatography using Golden Syrian and Armenian Hamster IgG coupled to agarose beads followed by solid phase adsorption(s) to remove any unwanted reactivities, pepsin digestion and chromatographic separation. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Goat Serum, Golden Syrian and Armenian Hamster IgG and Golden Syrian and Armenian Hamster Serum. No reaction was observed against anti-Pepsin,

anti-Goat IgG F(c) and Mouse or Rat Serum Proteins.

Storage Condition Store vial at 4° C prior to opening. This product is stable for several weeks

at 4° C as an undiluted liquid. Dilute only prior to immediate use. For extended storage, aliquot contents and freeze at -20° C or below. Avoid

cycles of freezing and thawing.

Precautions Note

This product is for research use only and is not intended for therapeutic or diagnostic applications.

Background

F(ab')2 Antibody was generated by enzymatic cleavage and subsequent separation from the Fc fragment. Because of their smaller size, F(ab)2 fragments offer several advantages over intact antibodies for use in certain immunochemical techniques and experimental applications. F(ab)2 fragments penetrate into tissue samples and show better antigen recognition and signal generation in IHC. F(ab)2 fragments lack the Fc region and therefore do not bind Fc receptors which effectively lowers background staining. F(ab')2 Antibody is ideal for investigators who routinely perform flow cytometry, immunohistochemistry or IHC and other immunoassays.

Please note: All products are 'FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC OR THERAPEUTIC PROCEDURES'.
