

Mouse IgG2a isotype control Phycoerythrin

Monoclonal M2A IgG2a , R-Phycoerythrin (RPE) Catalog # ASR3077

Product Information

Description MOUSE IgG2a isotype control Phycoerythrin conjugated

ConjugateR-Phycoerythrin (RPE)ClonalityMonoclonal M2A IgG2a

Physical State Lyophilized Host Isotype IgG2a

Buffer 0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2

Species of Origin Mouse **Reconstitution Volume** 1.0 mL

Reconstitution Buffer Restore with deionized water (or equivalent)

Stabilizer 10 mg/mL Bovine Serum Albumin (BSA) - Immunoglobulin and Protease free

Preservative 0.01% (w/v) Sodium Azide

Additional Information

Shipping Condition Ambient

Application Note Mouse IgG2a isotype control can be utilized as a control or standard reagent

in Flow cytometry, Western Blotting, and ELISA experiments where

determination of sample isotype is important.

Purity This product was prepared from ascitic fluid by affinity chromatography.

Assay by immunoelectro-phoresis resulted in a single precipitin arc against anti-Phycoerythrin and Anti-Mouse Serum. Specificity was confirmed by ELISA at less than 1% cross reactivity against other anti-Mouse heavy or light

chain isotypes antibodies.

Storage Condition Store vial at 4° C prior to opening. Dilute only prior to immediate use. Do not

freeze after reconstitution. Store reagent in the dark. This product is stable at

4° C as an undiluted liquid. Use subdued lighting during handling and

incubation of cells prior to analysis.

Precautions NoteThis product is for research use only and is not intended for therapeutic or

diagnostic applications.

Background

Isotype controls are important for Flow Cytometry and have no specificity for target cells within a particular experiment. Their purpose is to confirm the specificity of primary antibody binding that it is not a result of non-specific Fc receptor binding to cells or other cellular protein interactions. Isotype controls need to be matched to the specific primary Abs (species and isotype, including heavy and light chains) being used.
