F(ab')2 Anti-Mouse IgG (H&L) (Phycoerythrin Conjugated) Pre-Adsorbed Secondary Antibody

Donkey Polyclonal, R-Phycoerythrin (RPE) Catalog # ASR3196

Product Information

Description F(ab')2 Anti-MOUSE IgG [H&L] (DONKEY) Antibody Phycoerythrin

conjugated Min X Bv Ch Gt GP Ham Hs Hu Rb Rt & Sh Serum Proteins

Host Donkey

Conjugate R-Phycoerythrin (RPE)

Target Species Mouse
Reactivity Mouse
Clonality Polyclonal
Physical State Lyophilized
Host Isotype IgG F(ab')2

Target Isotype IgG (H&L)

Buffer 0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2

Immunogen F(ab')2 Anti-Mouse IgG whole molecule was produced by repeated

immunization with Mouse IgG whole molecule in donkey.

Reconstitution Volume 1.0 mL

Reconstitution Buffer Restore with deionized water (or equivalent)

Stabilizer 10 mg/mL Bovine Serum Albumin (BSA) - Immunoglobulin and Protease free

Preservative 0.01% (w/v) Sodium Azide

Additional Information

Shipping Condition Ambient

Application Note Suitable for immunomicroscopy and flow cytometry or FACS analysis as well

as other antibody based fluorescent assays requiring extremely low background levels, absence of F(c) mediated binding, lot-to-lot consistency, high titer and specificity. The maximum amount of reagent required to stain 1 x 10E6 cells in flow cytometry is approximately 1.0 □g of antibody conjugate. Lesser amounts of reagent may be sufficient for staining. Optimal titers for other applications should be determined by the researcher. As a general guideline dilutions of 1:100 to 1:250 should be suitable for most applications.

Purity F(ab')2 fragment PE conjugated secondary antibody was prepared

from monospecific antiserum by immunoaffinity chromatography using Mouse IgG coupled to agarose beads followed by solid phase adsorption(s) to remove any unwanted reactivities, pepsin digestion and chromatographic separation. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Phycoerythrin, anti-Donkey Serum, Mouse IgG and Mouse Serum. No reaction was observed against anti-Pepsin, anti-Donkey IgG F(c), Bovine, Chicken, Goat, Guinea Pig, Syrian Hamster, Horse, Human, Rabbit, Rat

or Sheep Serum Proteins.

Storage Condition Store vial at 4° C prior to opening. Dilute only prior to immediate use. Do not

freeze after reconstitution. Store reagent in the dark. This product is stable at

4° C as an undiluted liquid. Use subdued lighting during handling and

incubation of cells prior to analysis.

Precautions NoteThis product is for research use only and is not intended for therapeutic or

diagnostic applications.

Background

F(ab')2 Anti-Mouse IgG whole molecule generated in donkey detects specifically Mouse IgG whole molecule. This secondary antibody anti-Mouse is ideal for investigators who routinely perform ELISA, Sandwich ELISA, titration assays, western-blot, immunoprecipitation and more generally immunoassays.

Please note: All products are 'FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC OR THERAPEUTIC PROCEDURES'.
